Overview

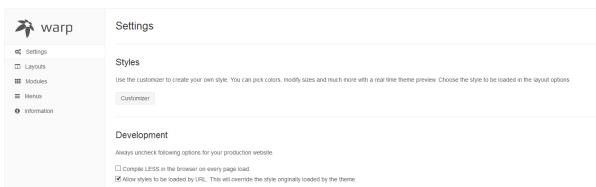

Template is based on the Warp 7 framework which is fast and powerful template engine.

Template Configuration

Template settings can be accessed under Joomla backend template configuration:

```
Extensions -> Templates -> cd_offerscart
```

Settings

Base settings has not been changed set to default.

Layouts

Sidebar-a has been set for *left alignment*

Sidebars

Choose the sidebar widths and align the sidebar to the left or right.

Position	Width	Alignment
sidebar-a	25% <input type="button" value="v"/>	Left <input type="button" value="v"/>
sidebar-b	25% <input type="button" value="v"/>	Right <input type="button" value="v"/>

Logo

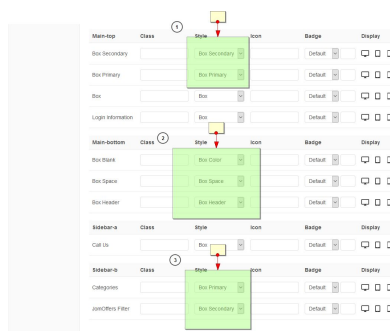

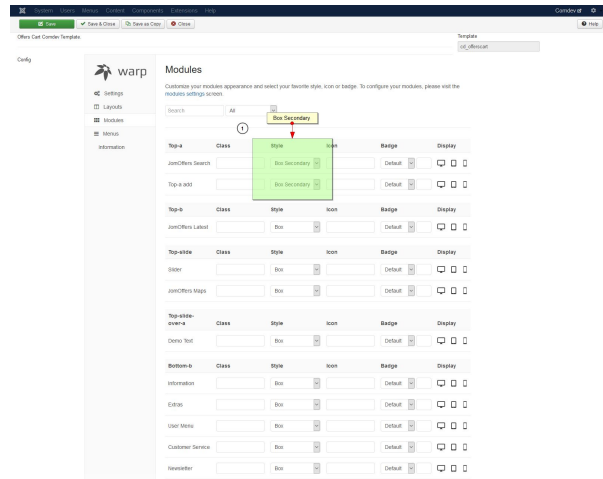

Logo must be placed in the logo position for the menu to be seen in the Menu position.

Logo Responsive

Copy of the main logo should be placed under Logo-mini position

Modules

Modules styles has been set accordingly:

There are several styles available for each module. The basic ones are **Box** and **Box Primary**. For each module header additionally an **Icon** can be set.

Responsive Menu

In order to make the menu responsive, create a copy of the main menu and place it in **OFF-CANVAS** position.

Toolbars (top page)
