MODULES

Common Modules for the extensions

- Live Search Maps Module
- Slideshow PRO Module

Live Search Maps Module

Overview

> **This is an extra paid module available for Business Package, can be also purchased separately.**

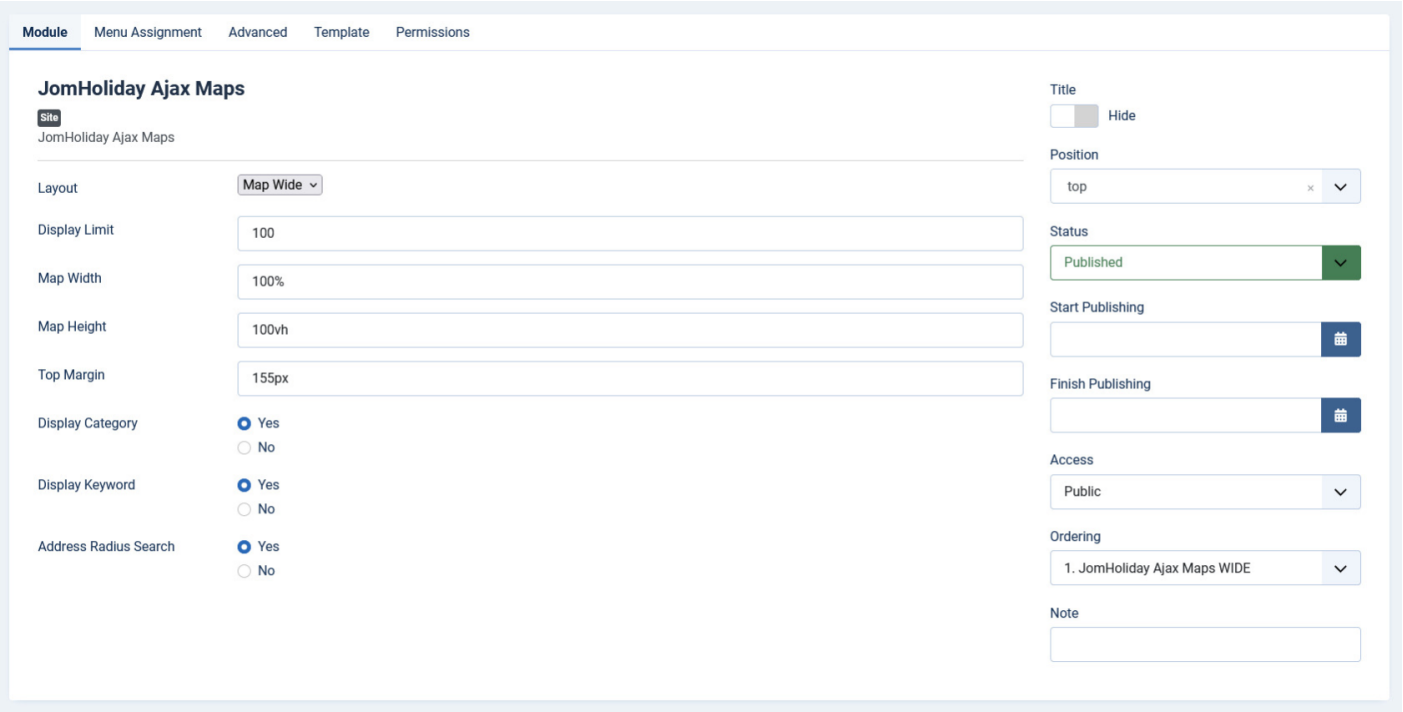

This module helps you view all the listings under full view or windowed map To view all the available modules, click **Extension** > **Module Manager**.

To create a new module, click **New**. Select the **EXTENSION_NAME Maps module**. Provide the information as given in the following sections. Click **Save** to save the module.

Editing the Maps Module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

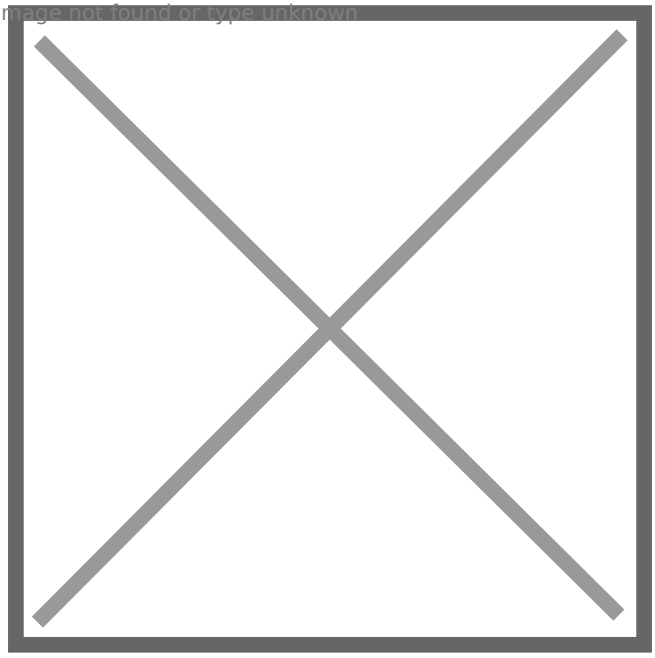

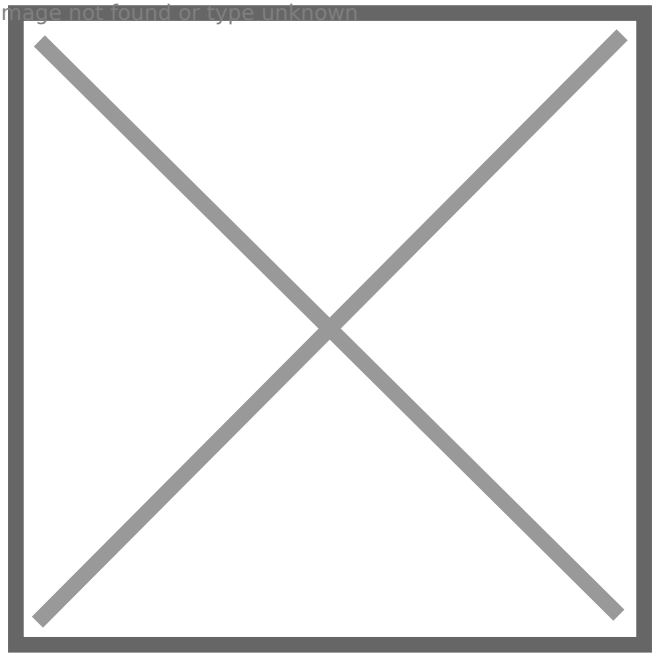

Screen 2: Module tab

Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

Screen 3: Module tab

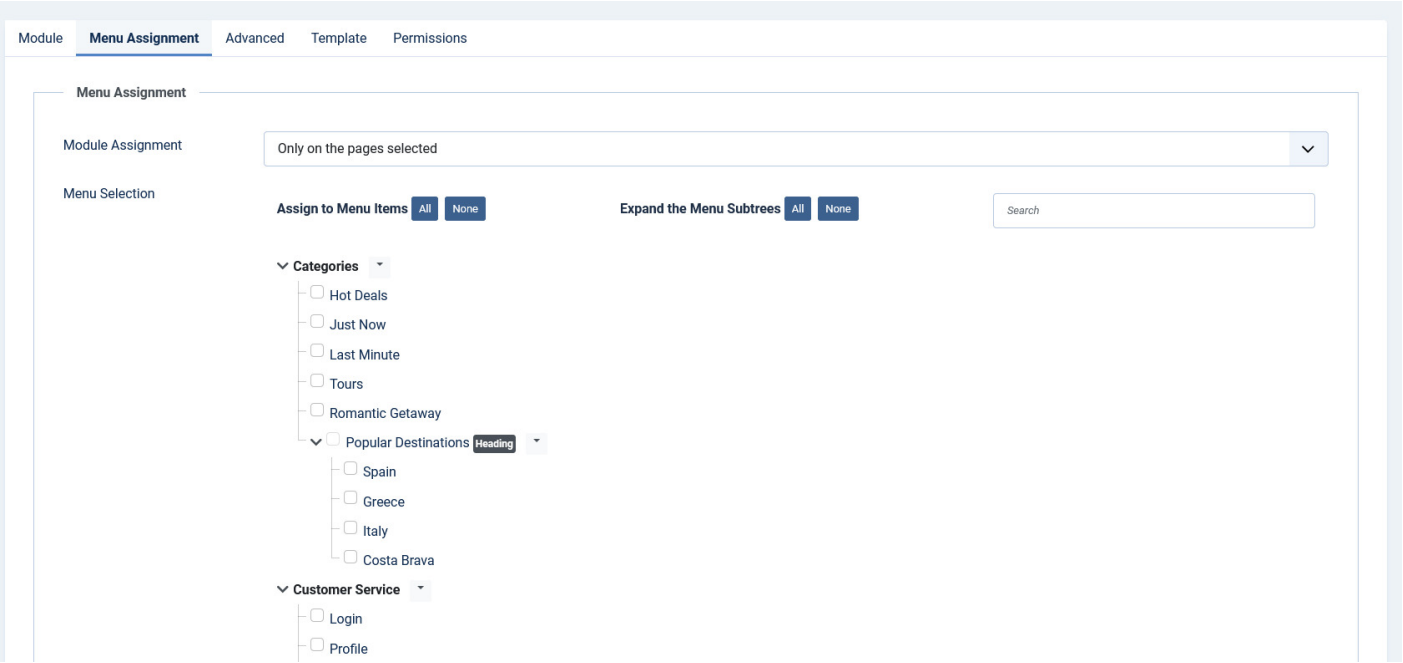

Provide the options as per the following table.

Layout	Select the required layout in the Layout field. The available options are: **Maps Wide** – layout with the search module on the left side and big map area on the right side, as seen in the following image: Image not found or type unknown  **Maps** – layout showing items on a map as seen in the following image: Image not found or type unknown 
Display limit	Limit number of items shown on the map
Map width	Set width of the map
Map height	Set height of the map

Top margin	Set top margin of the map
Display Category	Display category selection on the left of the wide map layout
Display Address	Display address selection on the left of the wide map layout
Display Keyword	Display keywords selection on the left of the wide map layout
Position	Select the position based on your Joomla Template.
Start Publishing	Provide a date when the search panel should be published.
Finish Publishing	Provide a date when the search panel should be unpublished.
Access	Provide access level for the panel. • Guest • Public • Registered • Special
Ordering	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
Language	Select the language for which you want to display this panel. For each language, you must create a new JomDirectory Search module.
Note	Provide additional information.

Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected

Creating custom category markers

When any listing is displayed on the map, it is shown as a pin. This pin icon is as in the default template. To modify this pinned icon as per your category, marker image needs to be placed under module images directory:

```
modules/mod_EXTENSION-NAME_maps/images/markers/...
```

The file name should be same as the category. The spaces need to be replaced with dashes " - " and the "*marke*r" prefix. So, suppose category name is **Auto Parts**, then the file name for the marker should be **marker_auto-parts.png**.

Slideshow PRO Module

Overview

> **This is an extra paid module available for Business Package, can be also purchased separately.**

This module showcases the listings in a slideshow format. Users can see the image along with the title of the listing.

Slideshow PRO Module upon activation is seen as follows on the pages:

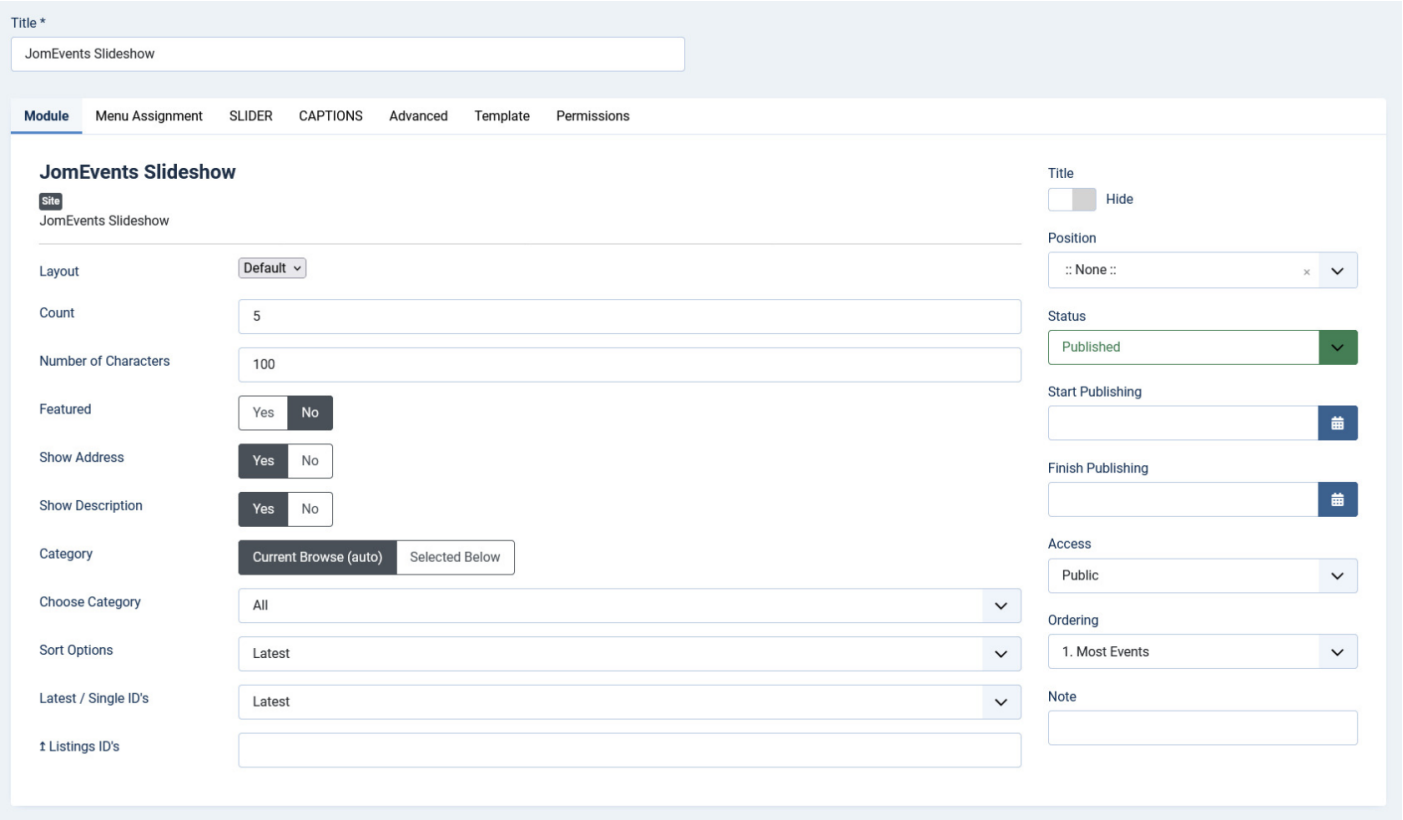

Screen 1: Slideshow Module on front page

Editing Slideshow Module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

Screen 2: Module tab

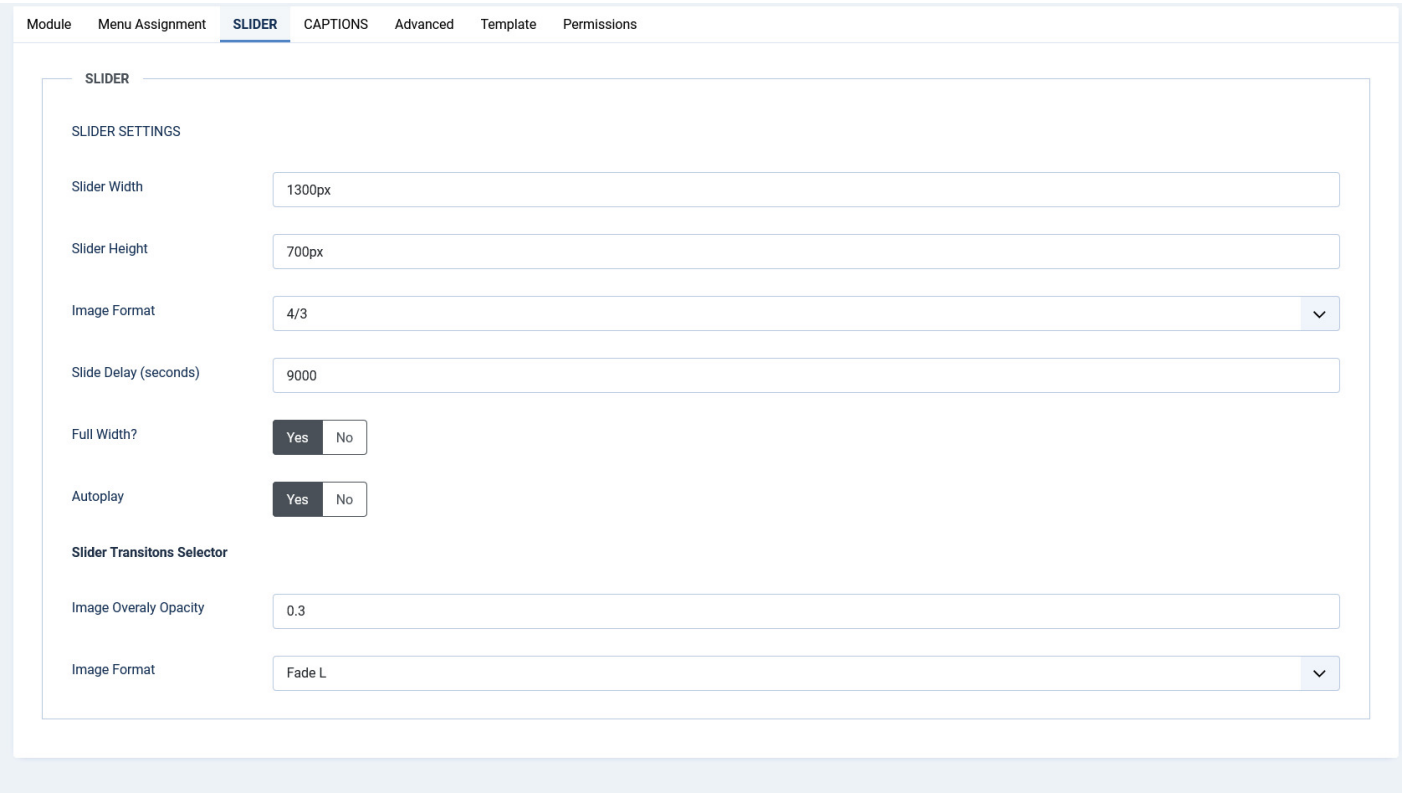

Provide the options as per the following table.

Count	Number of listings for which images need to be shown in the slideshow
Number of characters	Number of characters from the description that will be shown in the slideshow.
Image Format	The format for the thumbnail listing image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.
Featured	Enable to show only featured listings.

Show Address	Enable to show the address of the listing.
Show Description	Enable to show the description up to the character limit set.
Category	Select either of the following options. • Current Browse (auto) – Automatically displayed based on the category. • Selected Below – Listings belonging to only these categories are shown.
Choose Category	If Selected Below is selected for the above field, select the required category.
Sort Options	Select how the displayed listings should be sorted by. • Latest • Most Viewed • Alphabetically • Updated • Most Rated DESC • Most Rated ASC
Use Listings IDs	Enable to make the next set of settings work.
IDs CSS Item Styling	Provide comma separated IDs in this field. Such as, 21, 22 and so on.
Use IDs for the CSS Classes	If set to yes, to each Caption, CSS Class ID will be added e.g. .jd-slide-title21 where 21 is ID of the listing. Listing ID can be found under JomEvents Listing View in Table - Column ID. It works best with **Use Listings ID's** setting You can select individual listings and promote them with different captions. If set to No, the default CSS will be used for all captions.

Slider Module Tab

This tab controls the layout where the map panel is to be displayed on the screen.

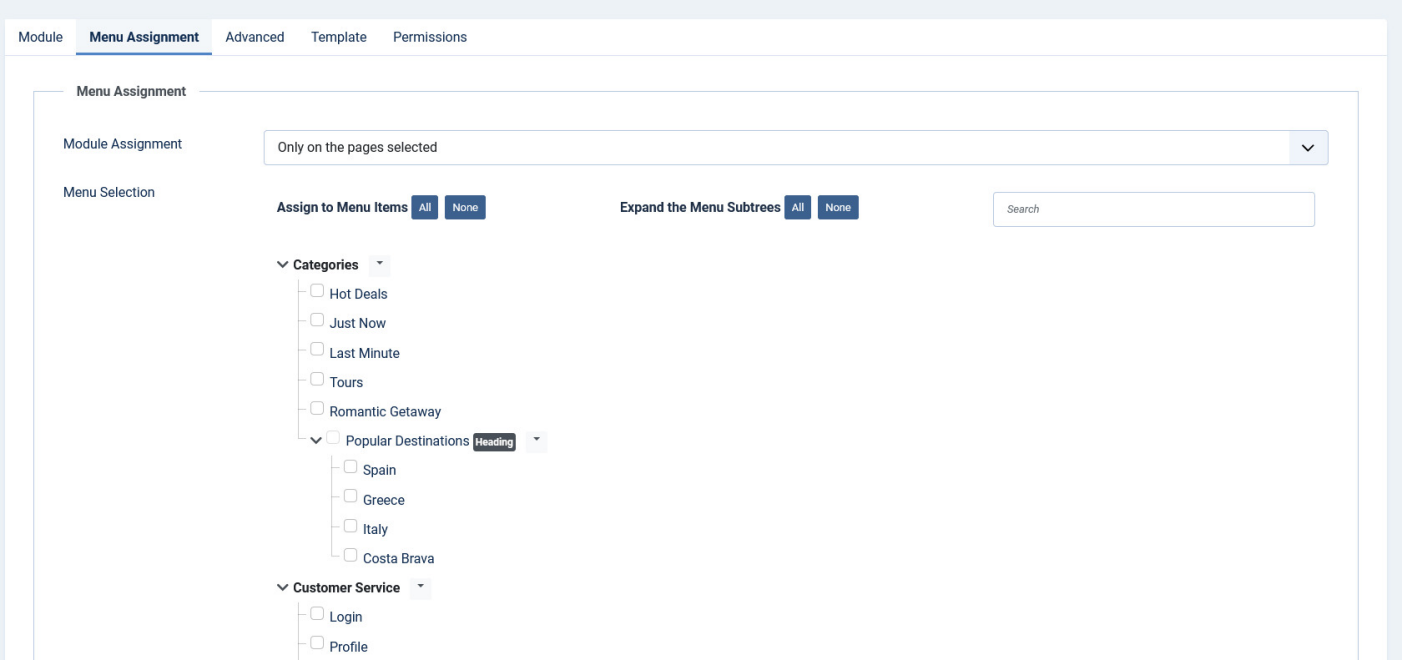

Screen 3: Slider Module tab
