Latest Items Module

Overview

Modules are extensions that assist in creating blocks of information on your site. They aggregate information from components and can be placed in predefined positions on the page based on your Joomla template.

JomDirectory Latest module

This module helps you create the panel where latest listings are displayed. You can decide where to position the latest panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager**. The modules available are listed as seen in the following image.

Editing the JomDirectory Latest module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

Module tab

This tab controls the layout where the latest listings panel is to be displayed on the screen.

- On all pages except those selected

Shopping Cart Addon Module

JomDirectory includes a shopping cart and checkout, so users can purchase items straight from your product catalogue. Shopping cart addon extends Products functionality by adding possibility to purchase products directly on the list or from the product details page. When addon is installed a new section Orders will appear where all purchases are being logged and also Order status can be changed.

Installing the Shopping Cart Module

The shopping cart module does not need to be installed in order for users to be able to make purchases. However, it does make it easier for users to keep track of their purchases and navigate to checkout.

Start by downloading the shopping cart module. Once downloaded, [install the module using Joomla's Extension Manager](#). Alternatively, you can [install directly from the web](#).

Configuring JomDirectory's Checkout

The first thing you must do is enable JomDirectory's checkout otherwise users will not be able to add items to the shopping cart and checkout those items for purchase.

To configure JomDirectory's checkout:

1. Log into the Joomla! administration control panel then navigate to the JomDirectory dashboard (Components -> Directory),
2. Click on the **Options** button (top right corner),
3. Select **Product** from the list of tabs,
4. Change **Enable Cart** to **Yes**,
5. **Save & Close**.

Configuring the Module

Once the JomDirectory shopping cart module has been successfully installed, you will need to configure, position and publish it.

The JomDirectory shopping cart is just like any other module and so many of the configuration options will look familiar. Go through the options and configure it to you liking. In particular,

configure the position and menu assignment and make sure that **Status** is set to **Published**.

IMPORTANT: Cart module should be assigned on all menus related to products!

Adding a Checkout Menu Item

If you have enabled the shopping cart module, you **MUST create a shopping cart checkout page menu item** otherwise the **View Cart** button will not work.

To create a new menu item for the JomDirectory's cart and checkout:

1. Log into the Joomla! administration control panel if you haven't already,
2. Navigate to the Menu Manager (Menus -> All Menu Items or select the menu you wish to add the item to),
3. Click on **New**,
4. Specify a menu item of "**Shopping Cart**",
5. Configure your menu item to your liking,
6. **Save & Close**.

If you are unfamiliar with Menu Manager check out [Joomla!'s menu management documentation](#).

Configure Shipping Providers

Shipping Providers can be configured under custom fields. To create a new shipping provider, access Product custom fields, click create new, field type input and choose **group shipping**. Once saved it will be available under Product custom fields.

Configure Online and Offline payments.

1. Log into the Joomla! administration control panel then navigate to the JomDirectory dashboard (Components -> Directory),
2. Click on the **Options** button (top right corner),
3. Select **Payments** from the list of tabs,
4. Configure online and if needed offline payments
5. **Save & Close**.

Purchasing a Product

On the frontend, navigate to Product Search or Product Filter; you should now see a cart icon against each product. Click on it, and the product will be added to your shopping cart. Once you have completed your purchase, click on **View Cart**. You will be redirected to your shopping cart where you will be able to purchase your items using JomDirectory's checkout process.

That's it! You're ready to start selling your goods.

Live Search Maps Module

Overview

This is an extra paid module available for Business Package, can be also purchased separately.

This module helps you view all the listings under full view or windowed map To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the **EXTENSION_NAME Maps module**. Provide the information as given in the following sections. Click **Save** to save the module.

Editing the Maps Module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

The screenshot displays the 'JomHoliday Ajax Maps' module edit screen. The interface is divided into several sections:

- Module Header:** Includes tabs for 'Module', 'Menu Assignment', 'Advanced', 'Template', and 'Permissions'. The 'Module' tab is active.
- Module Name:** 'JomHoliday Ajax Maps'.
- Site:** 'JomHoliday Ajax Maps'.
- Layout:** A dropdown menu set to 'Map Wide'.
- Display Limit:** A text input field containing '100'.
- Map Width:** A text input field containing '100%'.
- Map Height:** A text input field containing '100vh'.
- Top Margin:** A text input field containing '155px'.
- Display Category:** Radio buttons for 'Yes' (selected) and 'No'.
- Display Keyword:** Radio buttons for 'Yes' (selected) and 'No'.
- Address Radius Search:** Radio buttons for 'Yes' (selected) and 'No'.
- Title:** A toggle switch for 'Hide'.
- Position:** A dropdown menu set to 'top'.
- Status:** A dropdown menu set to 'Published'.
- Start Publishing:** A date picker icon.
- Finish Publishing:** A date picker icon.
- Access:** A dropdown menu set to 'Public'.
- Ordering:** A dropdown menu set to '1. JomHoliday Ajax Maps WIDE'.
- Note:** A text area for additional notes.

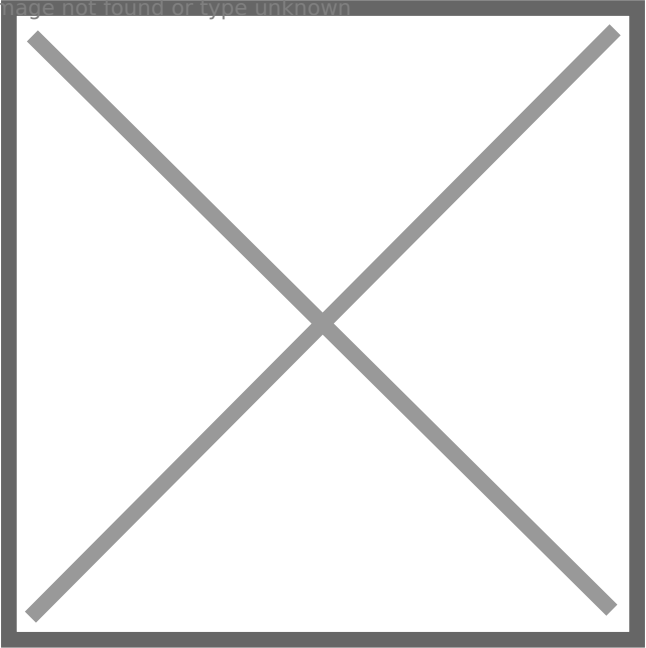

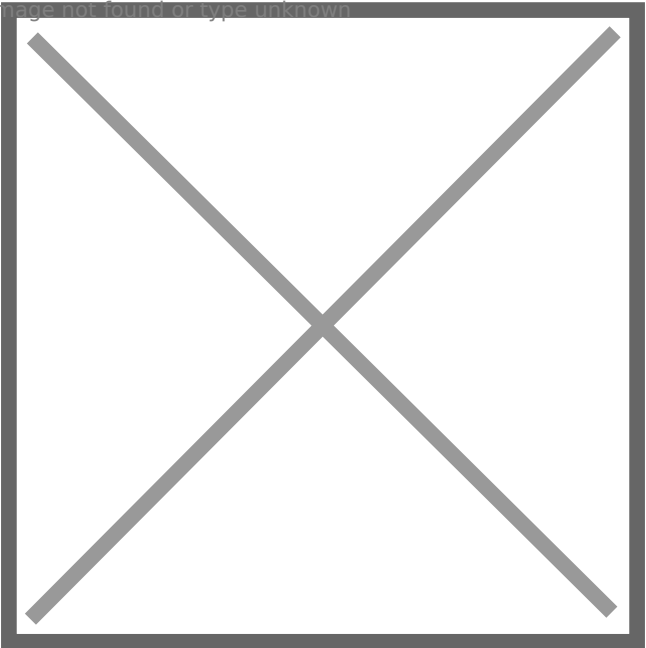

Screen 2: Module tab

Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

Screen 3: Module tab

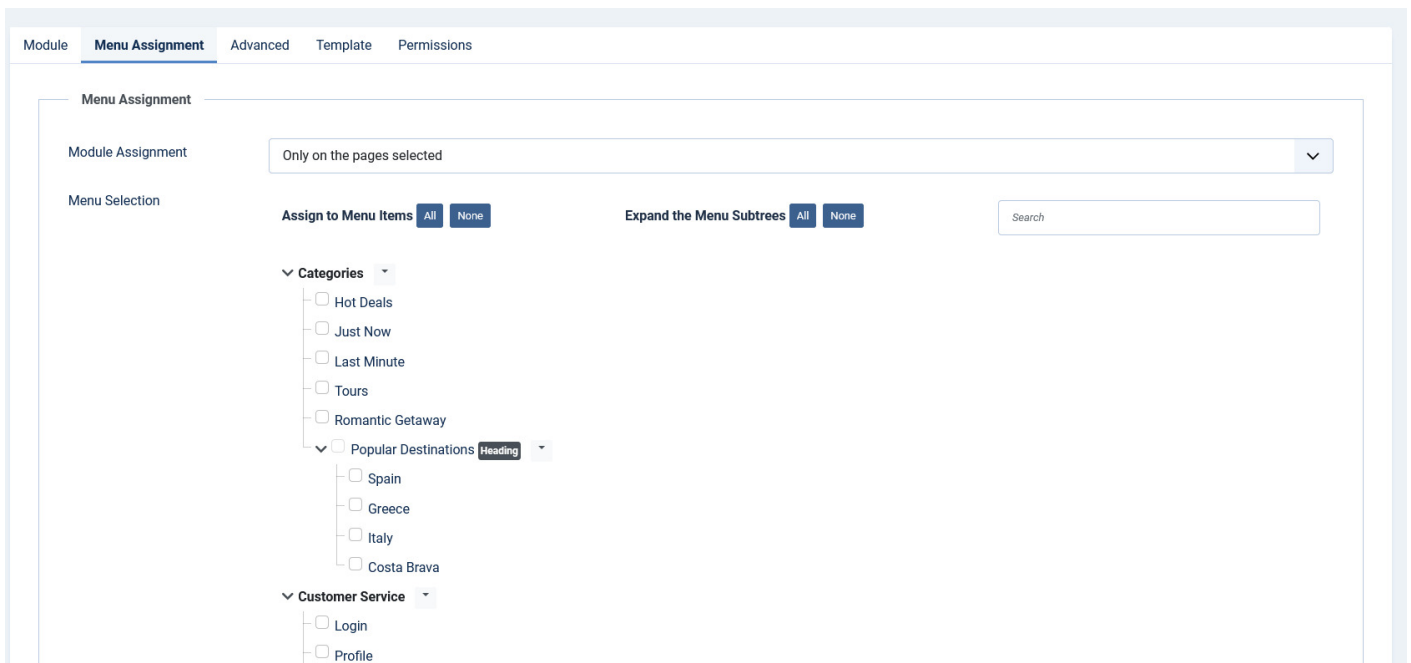

Provide the options as per the following table.

Layout	<p>Select the required layout in the Layout field. The available options are:</p> <p>Maps Wide – layout with the search module on the left side and big map area on the right side, as seen in the following image:</p> <p>Image not found or type unknown</p>  <p>Maps – layout showing items on a map as seen in the following image:</p> <p>Image not found or type unknown</p> 
Display limit	Limit number of items shown on the map
Map width	Set width of the map
Map height	Set height of the map

Top margin	Set top margin of the map
Display Category	Display category selection on the left of the wide map layout
Display Address	Display address selection on the left of the wide map layout
Display Keyword	Display keywords selection on the left of the wide map layout
Position	Select the position based on your Joomla Template.
Start Publishing	Provide a date when the search panel should be published.
Finish Publishing	Provide a date when the search panel should be unpublished.
Access	Provide access level for the panel. <ul style="list-style-type: none"> • Guest • Public • Registered • Special
Ordering	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
Language	Select the language for which you want to display this panel. For each language, you must create a new JomDirectory Search module.
Note	Provide additional information.

Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected

Creating custom category markers

When any listing is displayed on the map, it is shown as a pin. This pin icon is as in the default template. To modify this pinned icon as per your category, marker image needs to be placed under module images directory:

```
modules/mod_EXTENSION-NAME_images/markers/...
```

The file name should be same as the category. The spaces need to be replaced with dashes " - " and the "marker" prefix. So, suppose category name is **Auto Parts**, then the file name for the marker should be **marker_auto-parts.png**.

Slideshow PRO Module

Overview

This is an extra paid module available for Business Package, can be also purchased separately.

This module showcases the listings in a slideshow format. Users can see the image along with the title of the listing.

Slideshow PRO Module upon activation is seen as follows on the pages:

Screen 1: Slideshow Module on front page

Editing Slideshow Module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

The screenshot shows the 'Menu Assignment' tab within a larger interface. At the top, there are tabs for 'Module', 'Menu Assignment' (which is active), 'Advanced', 'Template', and 'Permissions'. Below the tabs, the 'Menu Assignment' section is divided into two main parts: 'Module Assignment' and 'Menu Selection'. In the 'Module Assignment' section, there is a dropdown menu currently set to 'Only on the pages selected'. In the 'Menu Selection' section, there are two buttons: 'Assign to Menu Items' with sub-buttons 'All' and 'None', and 'Expand the Menu Subtrees' with sub-buttons 'All' and 'None'. To the right of these buttons is a search input field labeled 'Search'. Below these controls is a tree structure of menu items. The 'Categories' section is expanded, showing a list of items with checkboxes: 'Hot Deals', 'Just Now', 'Last Minute', 'Tours', 'Romantic Getaway', and 'Popular Destinations'. The 'Popular Destinations' item is selected and has a 'Heading' dropdown next to it. Under 'Popular Destinations', there is a sub-tree with 'Spain', 'Greece', 'Italy', and 'Costa Brava', each with a checkbox. Below the 'Categories' section is the 'Customer Service' section, which is also expanded, showing 'Login' and 'Profile' with checkboxes.

Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected
