

# Search Module

## JomDirectory Search module

This module helps you create the search panel with fields that are searchable. All the fields that are defined as searchable during creation can be seen on this panel. You can decide where to position the search panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the JomDirectory Search module. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the JomDirectory Search module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

### Module tab

This tab controls the layout where the search panel is to be displayed on the screen
