# Latest Items Module

## Overview

This module helps you create the panel where latest listings are displayed. You can decide where to position the latest panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager**. The modules available are listed as seen in the following image.

**Screen 6: Module Manager listing**

## Editing the JomEstate Latest module

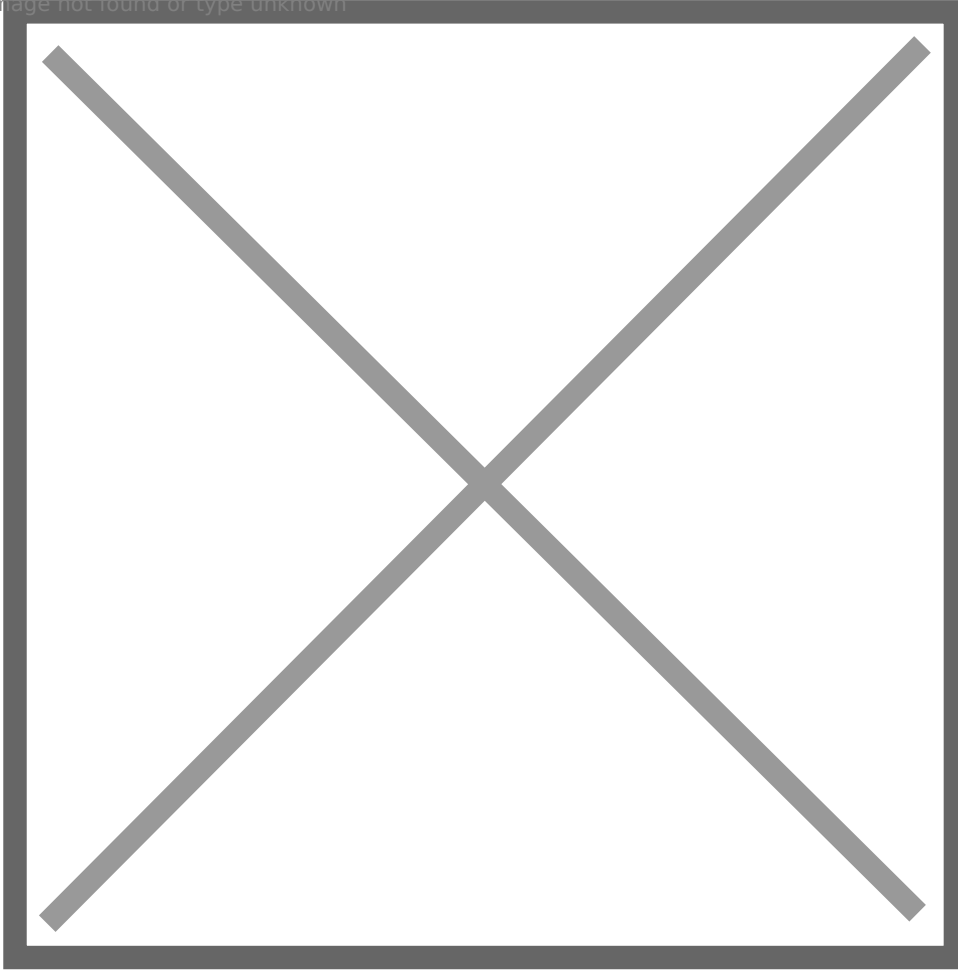

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

## Module tab

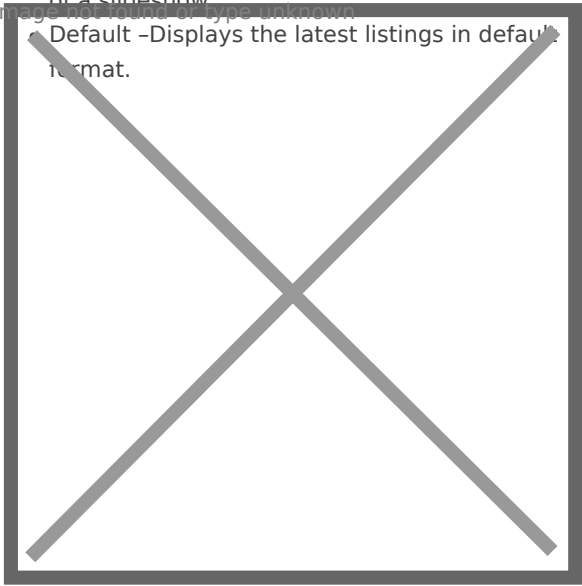

This tab controls the layout where the latest listings panel is to be displayed on the screen.

Image not found or type unknown

### Screen 8: Module tab

Provide the options as per the following table.

<b>Layout</b>	<p>Select the required layout in the Layout field. The available options are:</p> <ul style="list-style-type: none"><li>• Slider – Displays the latest listings in the form of a slideshow.</li><li>• Default –Displays the latest listings in default format.</li></ul> <p>Image not found or type unknown</p> 
<b>Count</b>	Number of listings that should be listed in the panel.
<b>Number of Characters</b>	Number of characters that will be displayed in the short description for listing thumbnail.
<b>Image Width</b>	Provide the image width for the thumbnail image. If Slider Layout set, image width must be same size than Slider Width or larger.
<b>Image Format</b>	The format for the thumbnail listing image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.
<b>Featured</b>	Enable to show only featured listings.
<b>Show Address</b>	Enable to show the address of the listing.
<b>Custom Fields</b>	Enable to show custom fields.
<b>Short Description</b>	Enable to show short description along with the listing image.
<b>Show Category</b>	Enable to show category for the listing.
<b>Show Price</b>	Enable to show the listing price.
<b>Category</b>	Enable either of the following options. <ul style="list-style-type: none"><li>• Current Browse (auto) – Automatically displayed based on the category.</li><li>• Selected Below – Listings belonging to only these categories are shown.</li></ul>

<b>Choose Category</b>	If Selected Below is selected for the above field, select the required category.
<b>Sort Options</b>	<p>Select how the displayed listings should be sorted by.</p> <ul style="list-style-type: none"> <li>• Latest</li> <li>• Most Viewed</li> <li>• Alphabetically</li> <li>• Updated</li> <li>• Most Rated DESC</li> <li>• Most Rated ASC</li> </ul>
<b>Slider Width</b>	Slider width in pixels
<b>Slider Height</b>	Slider height in pixels
<b>Slide Delay (seconds)</b>	Slideshow delay in seconds
<b>Slider Shadow</b>	Enable to provide the shadow effect.
<b>Slider Thumbs</b>	Enable to show image thumbnails
<b>Slider Caption</b>	Enable to show the image caption.
<b>Show Title</b>	Show or hide the title for the search panel.
<b>Position</b>	Select the position based on your Joomla Template.
<b>Status</b>	<p>Select from the given options.</p> <ul style="list-style-type: none"> <li>• Published</li> <li>• Unpublished</li> <li>• Trashed</li> </ul>
<b>Start Publishing</b>	Provide a date when the latest listings panel should be published.
<b>Finish Publishing</b>	Provide a date when the latest listings panel should be unpublished.
<b>Access</b>	<p>Provide access level for the panel.</p> <ul style="list-style-type: none"> <li>• Guest</li> <li>• Public</li> <li>• Registered</li> <li>• Special</li> </ul>
<b>Ordering</b>	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
<b>Language</b>	Select the language for which you want to display this panel. For each language, you must create a new JomEstate Latest module.
<b>Note</b>	Provide additional information.

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

The screenshot shows a web application interface with a top navigation bar containing 'Module', 'Menu Assignment' (highlighted), 'Advanced', 'Template', and 'Permissions'. Below this, the 'Menu Assignment' section is active. It features a 'Module Assignment' dropdown menu currently set to 'Only on the pages selected'. Under 'Menu Selection', there are two groups of buttons: 'Assign to Menu Items' with 'All' and 'None' options, and 'Expand the Menu Subtrees' with 'All' and 'None' options. A search bar is also present. A tree view is displayed with two main categories: 'Categories' and 'Customer Service'. The 'Categories' list includes 'Building and Constructions', 'Automotive and Transport', 'Programming and IT', 'Marketing and Advertising', 'Graphics and Multimedia', 'Home and Garden', 'Education and Research', 'Health and Beauty', and 'Food & Production'. The 'Customer Service' category is expanded, showing a sub-item 'Contact US' with a small icon.

## Screen 9: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected

# Search Module

## Overview

Modules are extensions that assist in creating blocks of information on your site. They aggregate information from components and can be placed in predefined positions on the page based on your Joomla template.

## JomEstate Search module

This module helps you create the search panel with fields that are searchable. All the fields that are defined as searchable during creation can be seen on this panel. You can decide where to position the search panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the JomEstate Search module. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the JomEstate Search module

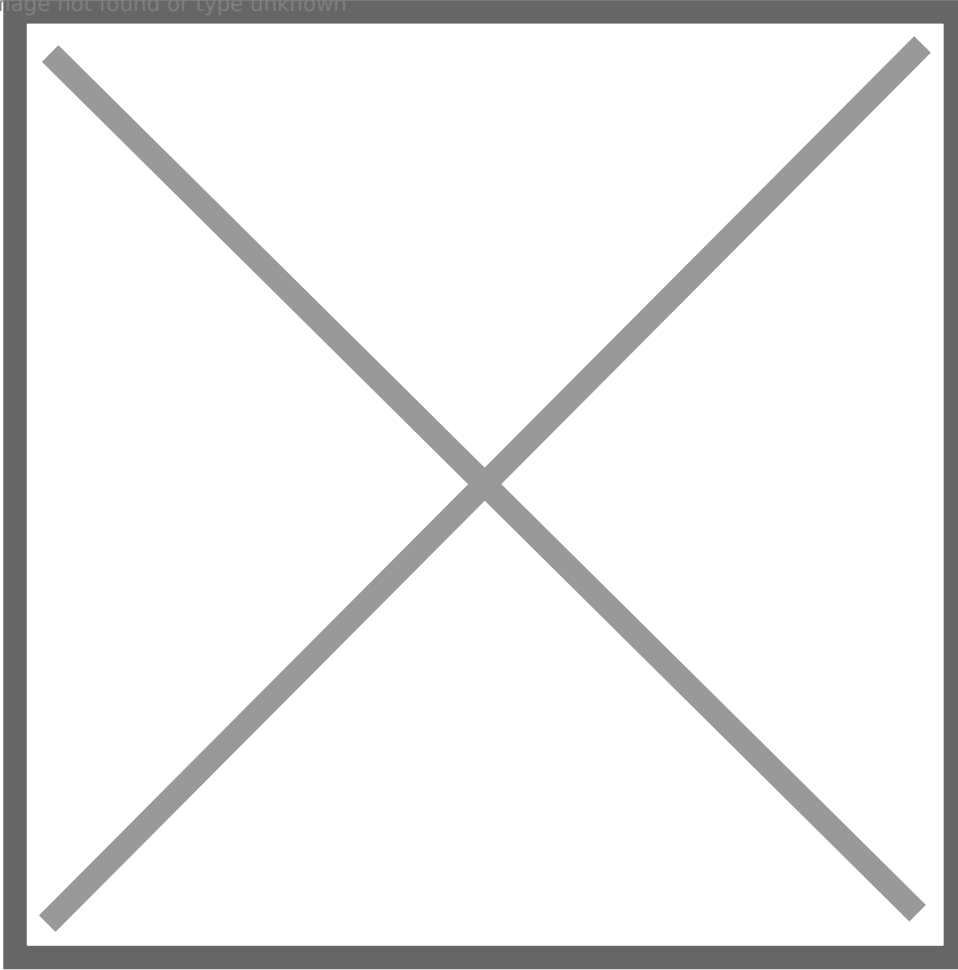

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

### Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

Image not found or type unknown

### Screen 3: Module tab

Provide the options as per the following table.

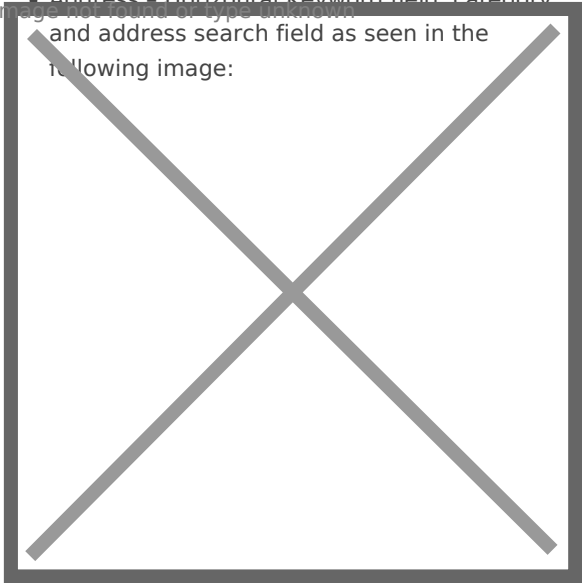

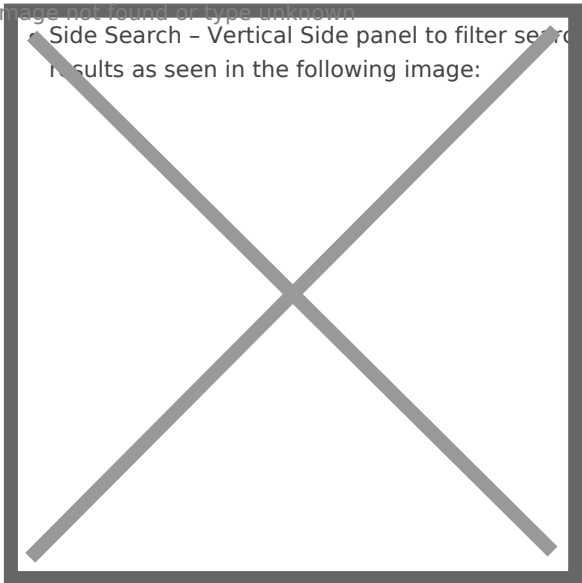

Layout

Select the required layout in the Layout field. The available options are:

- Address - Horizontal Keyword field, category and address search field as seen in the following image:

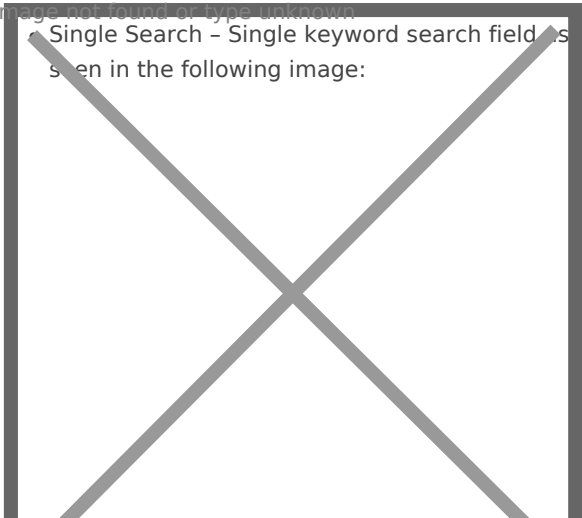

- Side Search - Vertical Side panel to filter search results as seen in the following image:

Custom fields that have the Field can be Searched field enabled are seen in this panel. For more information, see [Custom Fields](#) in the Administrative Guide.

- Single Search - Single keyword search field as seen in the following image:

Show Title	Show or hide the title for the search panel.
Position	Select the position based on your Joomla Template.
Status	Select from the following options. <ul style="list-style-type: none"><li>Published</li><li>Unpublished</li><li>Trashed</li></ul>
Start Publishing	Provide a date when the search panel should be published.
Finish Publishing	Provide a date when the search panel should be unpublished.
Access	Provide access level for the panel. <ul style="list-style-type: none"><li>Guest</li><li>Public</li><li>Registered</li><li>Special</li></ul>
Ordering	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
Language	Select the language for which you want to display this panel. For each language, you must create a new JomEstate Search module.
Note	Provide additional information.

# Live Search Maps Module

## Overview

**This is an extra paid module available for Business Package, can be also purchased separately.**

This module helps you view all the listings under full view or windowed map To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the **EXTENSION\_NAME Maps module**. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the Maps Module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

The screenshot displays the 'Module Manager' interface for editing the 'JomHoliday Ajax Maps' module. The interface is divided into two main sections: a left sidebar for module identification and a main content area for configuration.

**Module Identification:**

- Module:** JomHoliday Ajax Maps
- Site:** JomHoliday Ajax Maps

**Configuration Options:**

- Layout:** Map Wide (dropdown)
- Display Limit:** 100 (text input)
- Map Width:** 100% (text input)
- Map Height:** 100vh (text input)
- Top Margin:** 155px (text input)
- Display Category:** Yes (radio button)
- Display Keyword:** Yes (radio button)
- Address Radius Search:** Yes (radio button)

**Publishing and Access Settings:**

- Title:** Hide (checkbox)
- Position:** top (dropdown)
- Status:** Published (dropdown)
- Start Publishing:** (calendar icon)
- Finish Publishing:** (calendar icon)
- Access:** Public (dropdown)
- Ordering:** 1. JomHoliday Ajax Maps WIDE (dropdown)
- Note:** (text area)

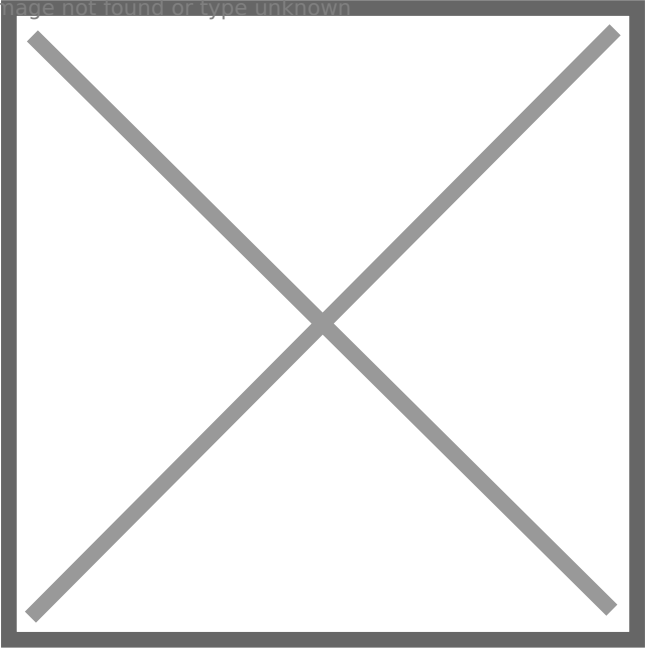

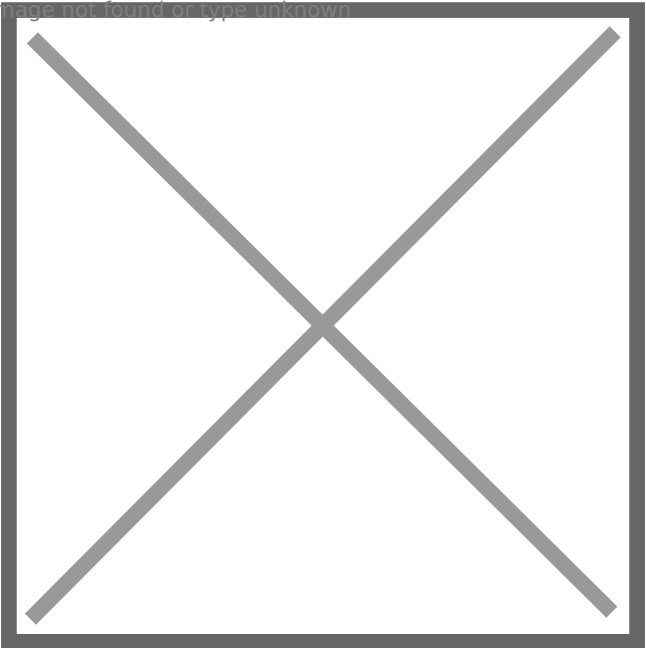

### Screen 2: Module tab

# Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

## Screen 3: Module tab

Provide the options as per the following table.

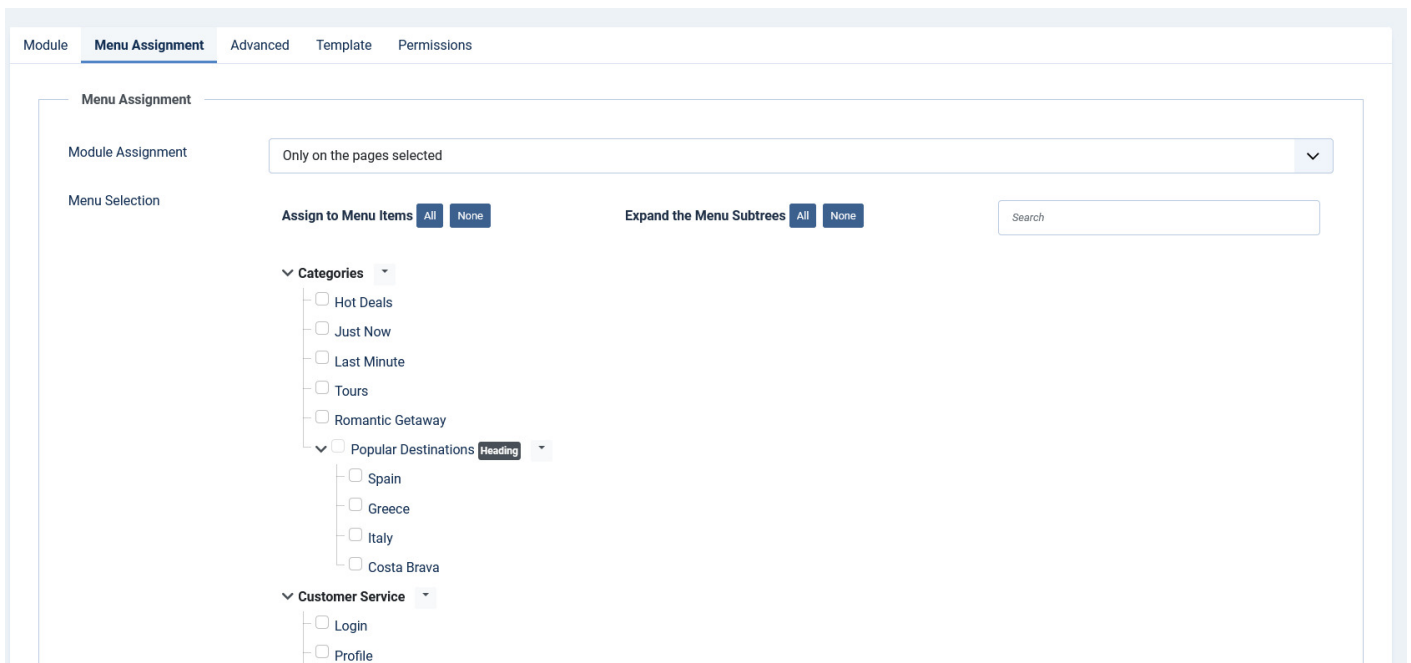

<b>Layout</b>	<p>Select the required layout in the Layout field. The available options are:</p> <p><b>Maps Wide</b> – layout with the search module on the left side and big map area on the right side, as seen in the following image:</p> <p>Image not found or type unknown</p>  <p><b>Maps</b> – layout showing items on a map as seen in the following image:</p> <p>Image not found or type unknown</p> 
<b>Display limit</b>	Limit number of items shown on the map
<b>Map width</b>	Set width of the map
<b>Map height</b>	Set height of the map

<b>Top margin</b>	Set top margin of the map
<b>Display Category</b>	Display category selection on the left of the wide map layout
<b>Display Address</b>	Display address selection on the left of the wide map layout
<b>Display Keyword</b>	Display keywords selection on the left of the wide map layout
<b>Position</b>	Select the position based on your Joomla Template.
<b>Start Publishing</b>	Provide a date when the search panel should be published.
<b>Finish Publishing</b>	Provide a date when the search panel should be unpublished.
<b>Access</b>	Provide access level for the panel. <ul style="list-style-type: none"> <li>• Guest</li> <li>• Public</li> <li>• Registered</li> <li>• Special</li> </ul>
<b>Ordering</b>	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
<b>Language</b>	Select the language for which you want to display this panel. For each language, you must create a new JomDirectory Search module.
<b>Note</b>	Provide additional information.

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

## Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected

# Creating custom category markers

When any listing is displayed on the map, it is shown as a pin. This pin icon is as in the default template. To modify this pinned icon as per your category, marker image needs to be placed under module images directory:

```
modules/mod_EXTENSION-NAME_images/markers/...
```

The file name should be same as the category. The spaces need to be replaced with dashes " - " and the "marker" prefix. So, suppose category name is **Auto Parts**, then the file name for the marker should be **marker\_auto-parts.png**.

# Slideshow PRO Module

## Overview

**This is an extra paid module available for Business Package, can be also purchased separately.**

This module showcases the listings in a slideshow format. Users can see the image along with the title of the listing.

Slideshow PRO Module upon activation is seen as follows on the pages:

**Screen 1: Slideshow Module on front page**

# Editing Slideshow Module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

## Screen 2: Module tab

Provide the options as per the following table.

Count	Number of listings for which images need to be shown in the slideshow
Number of characters	Number of characters from the description that will be shown in the slideshow.
Image Format	The format for the thumbnail listing image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.
Featured	Enable to show only featured listings.

<b>Show Address</b>	Enable to show the address of the listing.
<b>Show Description</b>	Enable to show the description up to the character limit set.
<b>Category</b>	<p>Select either of the following options.</p> <ul style="list-style-type: none"> <li>• Current Browse (auto) – Automatically displayed based on the category.</li> <li>• Selected Below – Listings belonging to only these categories are shown.</li> </ul>
<b>Choose Category</b>	If Selected Below is selected for the above field, select the required category.
<b>Sort Options</b>	<p>Select how the displayed listings should be sorted by.</p> <ul style="list-style-type: none"> <li>• Latest</li> <li>• Most Viewed</li> <li>• Alphabetically</li> <li>• Updated</li> <li>• Most Rated DESC</li> <li>• Most Rated ASC</li> </ul>
<b>Use Listings IDs</b>	Enable to make the next set of settings work.
<b>IDs CSS Item Styling</b>	Provide comma separated IDs in this field. Such as, 21, 22 and so on.
<b>Use IDs for the CSS Classes</b>	<p>If set to yes, to each Caption, CSS Class ID will be added e.g. .jd-slide-title21 where 21 is ID of the listing. Listing ID can be found under JomEvents Listing View in Table - Column ID. It works best with <b>Use Listings ID's</b> setting</p> <p>You can select individual listings and promote them with different captions.</p> <p>If set to No, the default CSS will be used for all captions.</p>

Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

The screenshot shows the 'Menu Assignment' tab within a larger interface. At the top, there are tabs for 'Module', 'Menu Assignment' (which is active), 'Advanced', 'Template', and 'Permissions'. Below the tabs, the 'Menu Assignment' section is visible. It includes a 'Module Assignment' dropdown menu currently set to 'Only on the pages selected'. Below this, the 'Menu Selection' section contains two groups of buttons: 'Assign to Menu Items' with 'All' and 'None' options, and 'Expand the Menu Subtrees' with 'All' and 'None' options. To the right of these buttons is a search input field labeled 'Search'. Below the buttons, there are two expandable sections: 'Categories' and 'Customer Service'. The 'Categories' section is expanded, showing a list of categories with checkboxes: 'Hot Deals', 'Just Now', 'Last Minute', 'Tours', 'Romantic Getaway', and 'Popular Destinations'. The 'Popular Destinations' category is further expanded, showing sub-items: 'Spain', 'Greece', 'Italy', and 'Costa Brava'. The 'Customer Service' section is also expanded, showing 'Login' and 'Profile' with checkboxes.

## Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected
