

Listings

Overview

Properties are nothing but the product listings that you want to create in the JomEstate. Each listing is attached to a category. They are created in the same manner as Joomla articles, but are not related to Joomla articles in definition.

Creating A New Listing

The following image shows the Listings screen.

The screenshot shows the Joomla! Properties screen. The left sidebar contains a navigation menu with items like Dashboard, Categories, Address, Properties, Properties Types, Price Types, Custom fields, Companies, Agents, Users, Membership Plans, Email Templates, Payments, Messages, Banners, and Comdev. The main content area displays a table of properties with columns for ID, STATUS, TITLE, CATEGORY, COMPANY / AGENT, BD/BTH/FL/GAR, USER, PUBLISHED, and HITS. The table contains five rows of property listings.

Understanding the Location area in Edit listing tab

Let us understand how to provide the address and Street/House No for providing the exact locations on the map. When you provide the address, street and House No. in the backend when creating listings, the location position automatically. If the House No. is not provided, additional location fields needs to be used.

Mapping using longitudes and latitudes

If you provide the latitudes and longitudes, and the Maps Search setting is left blank, the location mapping is done based on these parameters as shown in the following image.
