Price Types

Overview

Price types allow the site owner to categorize price types into appropriate sections. Nested price types (sub-price types) are supported in JomEstate. JomEstate comes with a price type named "**UNCATEGORISED**" which is the default setting. This price type will list properties which are not attached to any price type (same function as the default Joomla categories system).

Screen 1: Price type listing

Creating A New Price Type

To add a Price type to JomEstate, click New.

Provide the values as given in the following table.

Title	Title for the price type.
Alias	URL alias for “SEF/SEO” URL.
Parent	Choose the parent category item.
Text area	Provide a description in the text area.
Toggle editor *Button*	Click to toggle between rich text and plain text editor.

Image *Button*	Click to select an image you want to add to the listing.
Category Image	Currently not being used.

Publishing tab

After you have provided the above information, you can provide the publishing information in the Publishing tab

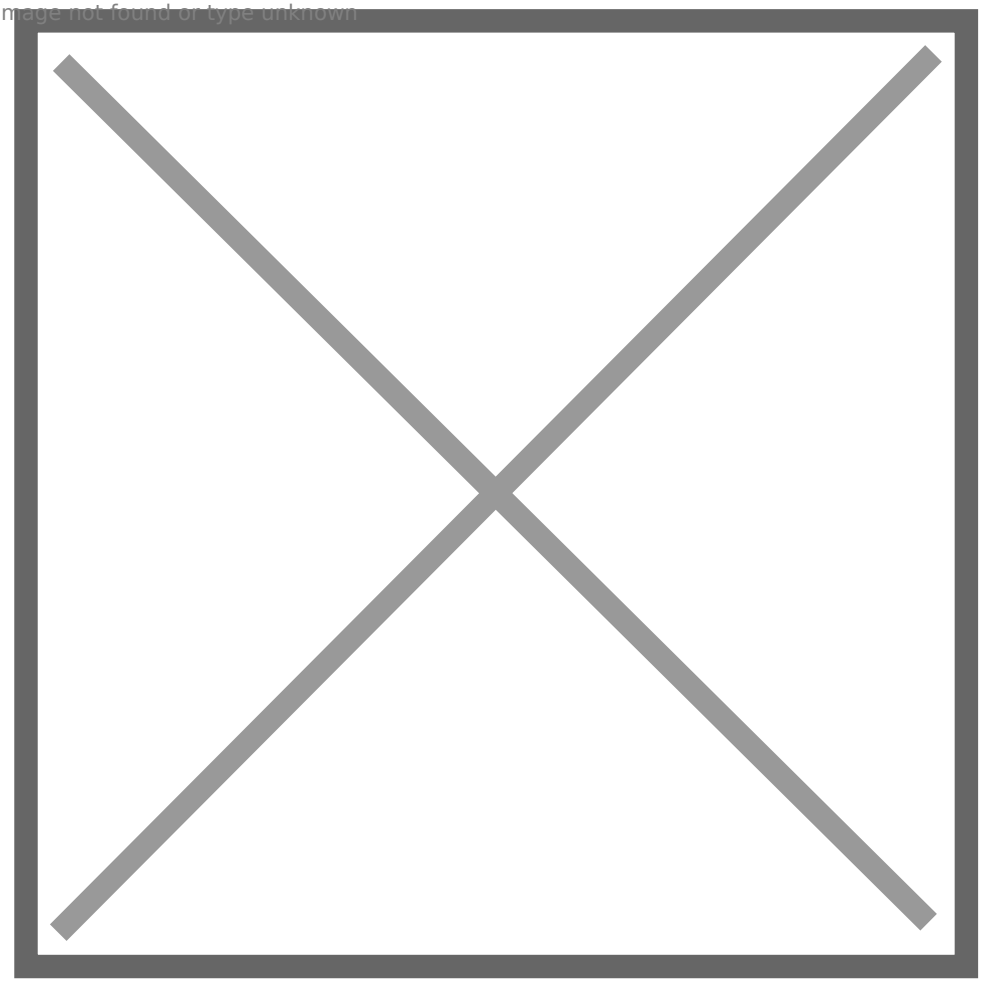

You can change the values for the given options using the following table.

Status	Based on the status seen here, the visibility changes as follows: • Published - Entries are visible on the front-end. • Unpublished – Entries are invisible in the front-end, but can be published later. • Archived – Older entries that are not ready for deletion yet. • Trashed – Older entries that should be removed.
Access	Access level for site users is as follows: • Public access grant access to everybody. • Registered access grants access only to registered and logged in users. • Special access only grants access to users specified as “Special”.
Language	Select the language for the price type.
ID	Address ID, which can be used in modules, plugins and menus.
Created by	User name who created the entry.
Created Date	Date when the entry was created.

Metadata tab

The metadata tab is used to provide metadata information for a particular address entry. The options for this tab can be seen as shown in the following image.

Image not found or type unknown

Screen 4: Metadata tab

You can change the values for the given options using the following table.

Meta Description	Meta-description for search-engine listings.
Meta Keywords	Meta Keywords for the search-engine
Author	Content author metadata.
Robots	Robots instructions: • Use Global • Index, Follow • No Index, Follow • Index, No Follow • No Index, No Follow
