

# Search Module

## Overview

Modules are extensions that assist in creating blocks of information on your site. They aggregate information from components and can be placed in predefined positions on the page based on your Joomla template.

## JomEstate Search module

This module helps you create the search panel with fields that are searchable. All the fields that are defined as searchable during creation can be seen on this panel. You can decide where to position the search panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the JomEstate Search module. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the JomEstate Search module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

### Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

Image not found or type unknown

### Screen 3: Module tab

Provide the options as per the following table.

Layout

Select the required layout in the Layout field. The available options are:

• Address - Horizontal Keyword field, category and address search field as seen in the following image:

A square placeholder with a thick dark border and a large gray 'X' across the center, indicating a missing image.

• Side Search - Vertical Side panel to filter search results as seen in the following image:

A square placeholder with a thick dark border and a large gray 'X' across the center, indicating a missing image.

Custom fields that have the Field can be Searched field enabled are seen in this panel. For more information, see [Custom Fields](#) in the Administrative Guide.

• Single Search - Single keyword search field as seen in the following image:

A square placeholder with a thick dark border and a large gray 'X' across the center, indicating a missing image.

Show Title	Show or hide the title for the search panel.
Position	Select the position based on your Joomla Template.
Status	Select from the following options. <ul style="list-style-type: none"><li>Published</li><li>Unpublished</li><li>Trashed</li></ul>
Start Publishing	Provide a date when the search panel should be published.
Finish Publishing	Provide a date when the search panel should be unpublished.
Access	Provide access level for the panel. <ul style="list-style-type: none"><li>Guest</li><li>Public</li><li>Registered</li><li>Special</li></ul>
Ordering	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
Language	Select the language for which you want to display this panel. For each language, you must create a new JomEstate Search module.
Note	Provide additional information.

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.
