# Latest Items Module

## Overview

This module helps you create the panel where latest listings are displayed. You can decide where to position the Items module on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager**. The modules available are listed as seen in the following image.

## Editing the JomEvents Items module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

## Module tab

This tab controls the layout where the Items module panel is to be displayed on the screen.

# Search Module

## Overview

Modules are extensions that assist in creating blocks of information on your site. They aggregate information from components and can be placed in predefined positions on the page based on your Joomla template.

## JomEvents Search module

This module helps you create the search panel with fields that are searchable. All the fields that are defined as searchable during creation can be seen on this panel. You can decide where to position the search panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the JomEvents Search module. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the JomEvents Search module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

# Live Search Maps Module

## Overview

**This is an extra paid module available for Business Package, can be also purchased separately.**

This module helps you view all the listings under full view or windowed map To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the **EXTENSION\_NAME Maps module**. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the Maps Module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

The screenshot displays the 'JomHoliday Ajax Maps' module edit screen. The interface is divided into several sections:

- Module Header:** Includes tabs for 'Module', 'Menu Assignment', 'Advanced', 'Template', and 'Permissions'. The 'Module' tab is active.
- Module Name:** 'JomHoliday Ajax Maps'.
- Site:** 'JomHoliday Ajax Maps'.
- Layout:** A dropdown menu set to 'Map Wide'.
- Display Limit:** A text input field containing '100'.
- Map Width:** A text input field containing '100%'.
- Map Height:** A text input field containing '100vh'.
- Top Margin:** A text input field containing '155px'.
- Display Category:** Radio buttons for 'Yes' (selected) and 'No'.
- Display Keyword:** Radio buttons for 'Yes' (selected) and 'No'.
- Address Radius Search:** Radio buttons for 'Yes' (selected) and 'No'.
- Title:** A text input field with a 'Hide' button.
- Position:** A dropdown menu set to 'top'.
- Status:** A dropdown menu set to 'Published'.
- Start Publishing:** A text input field with a calendar icon.
- Finish Publishing:** A text input field with a calendar icon.
- Access:** A dropdown menu set to 'Public'.
- Ordering:** A dropdown menu set to '1. JomHoliday Ajax Maps WIDE'.
- Note:** A text input field.

### Screen 2: Module tab

# Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

## Screen 3: Module tab

Provide the options as per the following table.

<b>Layout</b>	<p>Select the required layout in the Layout field. The available options are:</p> <p><b>Maps Wide</b> – layout with the search module on the left side and big map area on the right side, as seen in the following image:</p> <p>Image not found or type unknown</p>  <p><b>Maps</b> – layout showing items on a map as seen in the following image:</p> <p>Image not found or type unknown</p> 
<b>Display limit</b>	Limit number of items shown on the map
<b>Map width</b>	Set width of the map
<b>Map height</b>	Set height of the map

<b>Top margin</b>	Set top margin of the map
<b>Display Category</b>	Display category selection on the left of the wide map layout
<b>Display Address</b>	Display address selection on the left of the wide map layout
<b>Display Keyword</b>	Display keywords selection on the left of the wide map layout
<b>Position</b>	Select the position based on your Joomla Template.
<b>Start Publishing</b>	Provide a date when the search panel should be published.
<b>Finish Publishing</b>	Provide a date when the search panel should be unpublished.
<b>Access</b>	Provide access level for the panel. <ul style="list-style-type: none"> <li>• Guest</li> <li>• Public</li> <li>• Registered</li> <li>• Special</li> </ul>
<b>Ordering</b>	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
<b>Language</b>	Select the language for which you want to display this panel. For each language, you must create a new JomDirectory Search module.
<b>Note</b>	Provide additional information.

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

## Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected

# Creating custom category markers

When any listing is displayed on the map, it is shown as a pin. This pin icon is as in the default template. To modify this pinned icon as per your category, marker image needs to be placed under module images directory:

```
modules/mod_EXTENSION-NAME_images/markers/...
```

The file name should be same as the category. The spaces need to be replaced with dashes " - " and the "marker" prefix. So, suppose category name is **Auto Parts**, then the file name for the marker should be **marker\_auto-parts.png**.

# Slideshow PRO Module

## Overview

**This is an extra paid module available for Business Package, can be also purchased separately.**

This module showcases the listings in a slideshow format. Users can see the image along with the title of the listing.

Slideshow PRO Module upon activation is seen as follows on the pages:

**Screen 1: Slideshow Module on front page**

# Editing Slideshow Module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

Note

## Screen 2: Module tab

Provide the options as per the following table.

Count	Number of listings for which images need to be shown in the slideshow
Number of characters	Number of characters from the description that will be shown in the slideshow.
Image Format	The format for the thumbnail listing image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.
Featured	Enable to show only featured listings.

<b>Show Address</b>	Enable to show the address of the listing.
<b>Show Description</b>	Enable to show the description up to the character limit set.
<b>Category</b>	<p>Select either of the following options.</p> <ul style="list-style-type: none"> <li>• Current Browse (auto) – Automatically displayed based on the category.</li> <li>• Selected Below – Listings belonging to only these categories are shown.</li> </ul>
<b>Choose Category</b>	If Selected Below is selected for the above field, select the required category.
<b>Sort Options</b>	<p>Select how the displayed listings should be sorted by.</p> <ul style="list-style-type: none"> <li>• Latest</li> <li>• Most Viewed</li> <li>• Alphabetically</li> <li>• Updated</li> <li>• Most Rated DESC</li> <li>• Most Rated ASC</li> </ul>
<b>Use Listings IDs</b>	Enable to make the next set of settings work.
<b>IDs CSS Item Styling</b>	Provide comma separated IDs in this field. Such as, 21, 22 and so on.
<b>Use IDs for the CSS Classes</b>	<p>If set to yes, to each Caption, CSS Class ID will be added e.g. .jd-slide-title21 where 21 is ID of the listing. Listing ID can be found under JomEvents Listing View in Table - Column ID. It works best with <b>Use Listings ID's</b> setting</p> <p>You can select individual listings and promote them with different captions.</p> <p>If set to No, the default CSS will be used for all captions.</p>

Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

The screenshot shows the 'Menu Assignment' tab within a larger interface. At the top, there are four tabs: 'Module', 'Menu Assignment' (which is active), 'Advanced', 'Template', and 'Permissions'. Below the tabs, the 'Menu Assignment' section is divided into two main parts. The first part, 'Module Assignment', contains a dropdown menu currently set to 'Only on the pages selected'. The second part, 'Menu Selection', contains two buttons: 'Assign to Menu Items' (with 'All' and 'None' sub-buttons) and 'Expand the Menu Subtrees' (with 'All' and 'None' sub-buttons). To the right of these buttons is a search bar labeled 'Search'. Below the buttons, there are two expandable sections. The first is 'Categories', which is expanded to show a list of categories with checkboxes: 'Hot Deals', 'Just Now', 'Last Minute', 'Tours', 'Romantic Getaway', and 'Popular Destinations'. The 'Popular Destinations' category is further expanded to show sub-items: 'Spain', 'Greece', 'Italy', and 'Costa Brava'. The second expandable section is 'Customer Service', which is also expanded to show 'Login' and 'Profile' with checkboxes.

#### Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected
