Image not found or type unknown

Screen 2: Media tab

The following table explains the options seen on the screen.

Default Image Library	Select the default image library for the listings component between “GD” and “iMagick”. For more information see: http://en.wikipedia.org/wiki/GD_Graphics_Library http://en.wikipedia.org/wiki/Imagick
Max Image Size	Provide the maximum image size.
Max Attachment Size	The component wide settings for maximum Attachment size in kilo-byte. (1024 KB = 1 MB)
Video Width	Embedded Video width in pixels. (size of the grey-box video player) Default Youtube.com size is either 480×385 for a 4:3 video, or 640×385 for a 16:9 video.
Video Height	Embedded Video height in pixels. (size of the grey-box video player) Default Youtube.com size is either 480×385 for a 4:3 video, or 640×385 for a 16:9 video.

Allowed Files Extensions	Comma separated list of allowed attachment file-extensions.
Slideshow Width	Image width in pixels for the slideshow display area width.
Slideshow Format	The format for the main listing image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.
Items Logo Width	Image width in pixels for Items Logo on the listing page.
Item Logo Image Width	Image width in pixels for Item Logo on the listing page.
Main Gallery Image Width	Image width in pixels for main gallery image. Ensure that the width value given here is as wide as or more than the slideshow width (generally 800-1200 pixels). If this is not done, the slideshow images will be blurred.
Main Gallery Image Height	Image height in pixels for main gallery image.
Main Gallery Image Format	The format for the main gallery image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.

After the images width or format are changed in the Media tab, ensure that you **clear the cache** for JomEvents extension. Click System > Clear Cache -> check com_jomcomdev to clear the Joomla cache for our extension.
If possible, image format should be constant for both component and modules. Otherwise, cache issues may appear.

Currency & Price tab

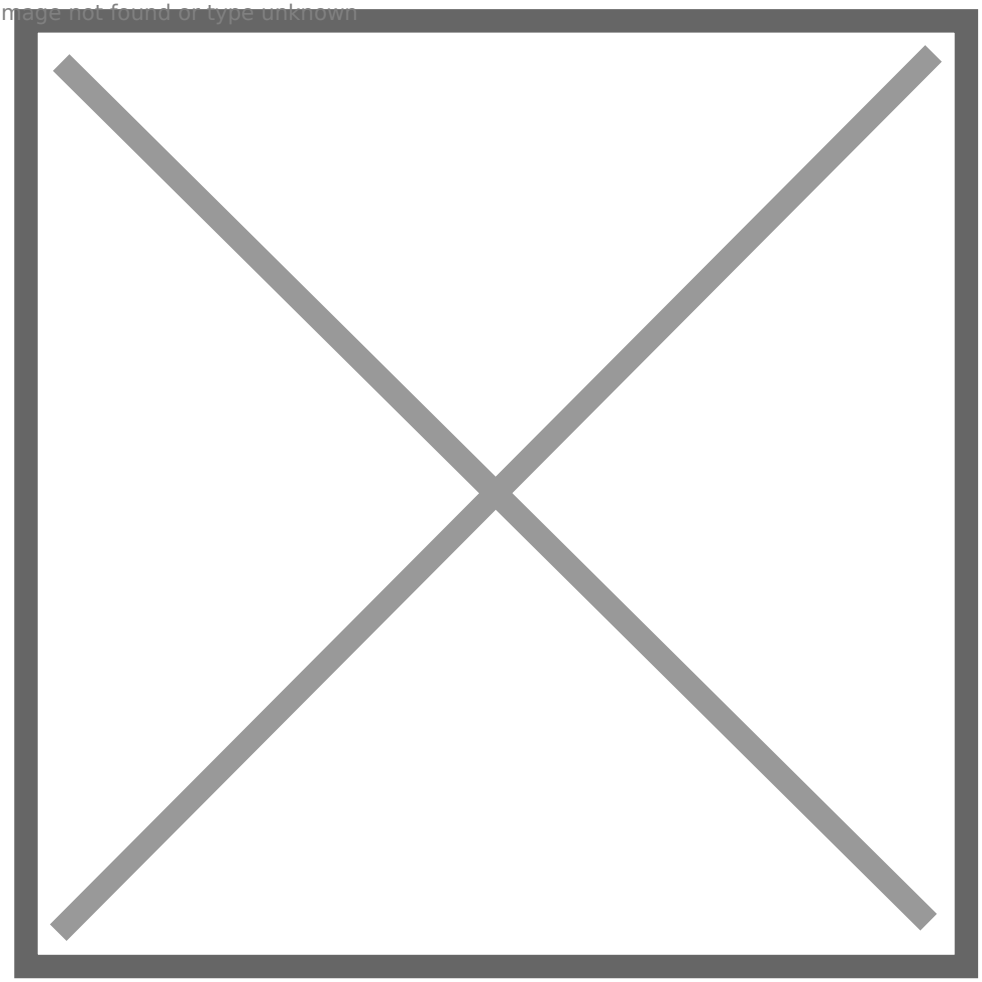

This tab provides options to control display of currency formats for listings.

General | Media | Email | **Currency & Price** | Membership Plans | Integrations | Frontadmin | Permissions

Currency & Price

Currency	EUR - Euro
