

# Venue

## Overview

Venues are locations where the event is to be held. You can add arenas, concert halls, or more based on your requirements. Before you create Venues, ensure that you have created Venue Categories.

### Creating A New Venue

To create a new Venue, click New. The following image shows the venues listing in the venues administration screen.

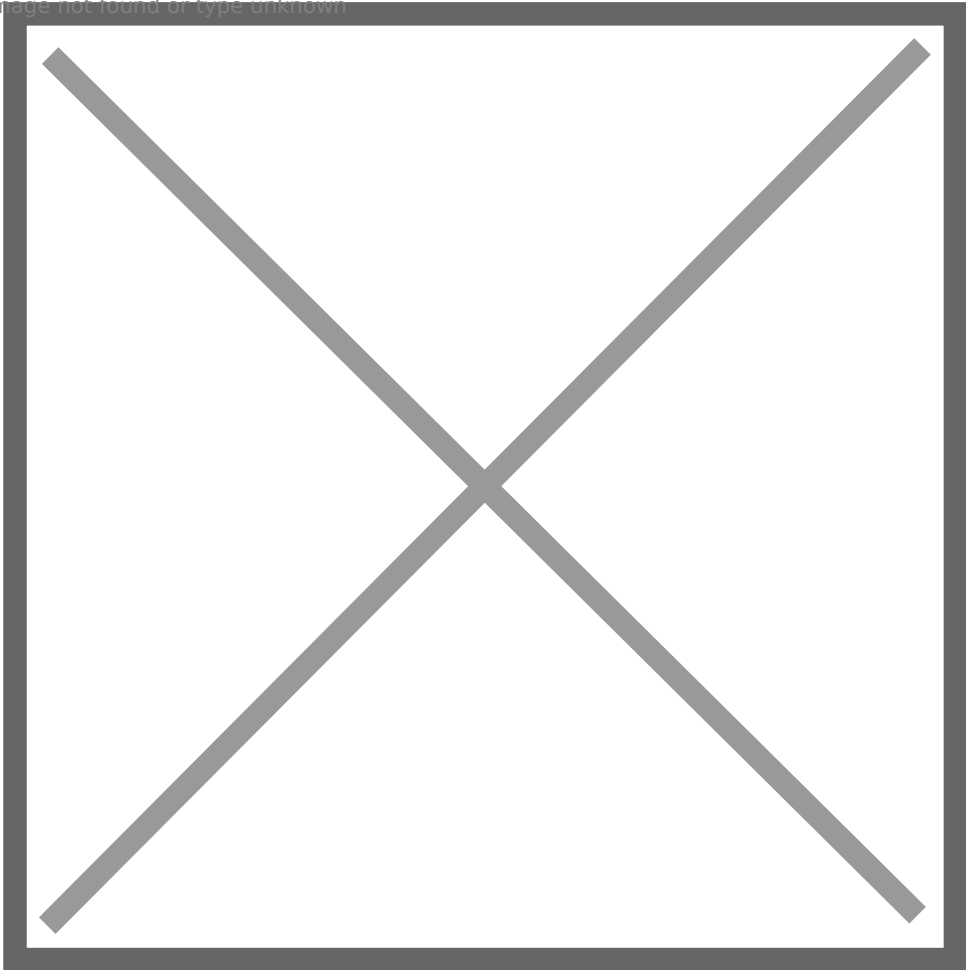

The screenshot displays the Joomla! administration interface for the 'Venues' component. The top navigation bar includes links to Home Dashboard, Content, Menus, Components, Users, System, and Help. The Joomla! logo and version 4.3.4 are visible on the left, and the 'JomEvents Comdev' logo is on the right. Below the navigation bar, a toolbar contains buttons for Save, Save & Close, Save & New, Save as Copy, and Close. The main content area is titled 'Edit Venue' and has tabs for 'Images' and 'Metadata'. The form fields are as follows:

- Name \***: Text input with value 'COLMAR'.
- Alias**: Text input with value 'colmar'.
- Category \***: Dropdown menu with value 'Arena'.
- Address**: Dropdown menu with value 'Colmar'.
- Street, Number**: Text input.
- Description**: Text area with a small table header containing the number '1'.

On the right side, there is a green sidebar with the following fields:

- User**: Select a User button.
- Language**: Dropdown menu with value 'All'.
- Status**: Dropdown menu with value 'Published'.
- Approved**: Dropdown menu with value 'Yes'.
- Date created**: Text input with value '2016-12-21 16:40:26' and a calendar icon.
- Modified Date**: Text input with a calendar icon.
- Publish Up**: Text input with value '2016-12-21 16:40:26' and a calendar icon.
- Publish down**: Text input with a calendar icon.
- ID**: Text input with value '14'.

# Edit Venue tab

To edit a venue, either click the venue or select the check box next to the venue and click Edit.

Provide the options as shown in the following table.

| Name           | Name for the membership plan.                 |
|----------------|---|
| Alias          | URL alias for “SEF/SEO” URL.                  |
| Category       | Category where the listing will be published. |
| Address        | Choose the address of the venue.              |
| Street, Number | Enter the street address of the venue.        |
| User           | Select the JomEvents user for the venue.      |

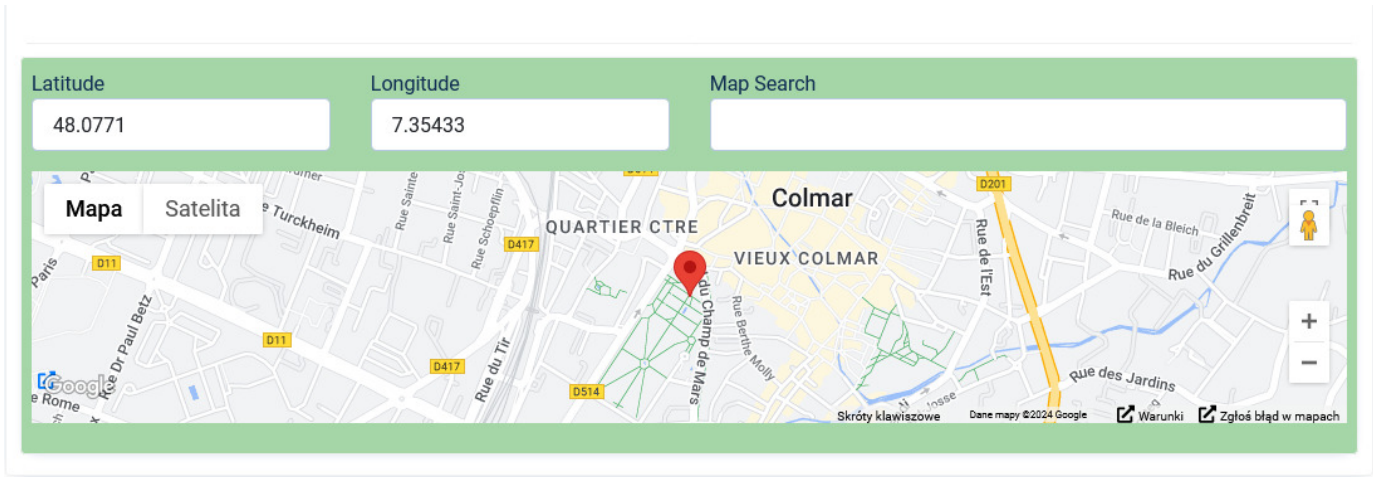

| Name          | Name for the membership plan.   |
|---------------|---|
| Status        | <p>“Published” Items will be visible in the front-end.</p> <p>“Unpublished” Items will be invisible in the front-end but intended to be published.</p> <p>“Archived” Items are old items which are not ready for deletion yet.</p> <p>“Trashed” Items are old items that should be removed.</p> |
| Approved      | Choose if the Venue is approved or not (Y/N)  |
| Language      | Choose the language for the venue.  |
| ID            | This field is auto-populated.   |
| Description   | Type your description here, the functionality is the same as main Joomla articles.  |
| Article       | Click to select Joomla articles that are related to the venue.  |
| Image         | Click to select the images related to the venue.  |
| Toggle editor | Click to toggle between rich text and plain text editors.   |
| Latitude      | It utilizes the GEO-location based on Google Maps. Provide the latitude information for the location mapping.   |
| Longitude     | <p>The information provided in this field is used to map the exact location. It utilizes the GEO-location based on Google Maps.</p> <p>Provide the longitude information for the location mapping.</p>  |
| Map Search    | Search for a specific location. Type in the location and press Enter to go to the exact location.   |

## Understanding the Location area in Edit listing tab

Let us understand how to provide the address and Street/House No for providing the exact locations on the map. When you provide the address, street and House No. in the backend when creating venues, the location position automatically. If the House No. is not provided, additional location fields needs to be used.

### Mapping using longitudes and latitudes

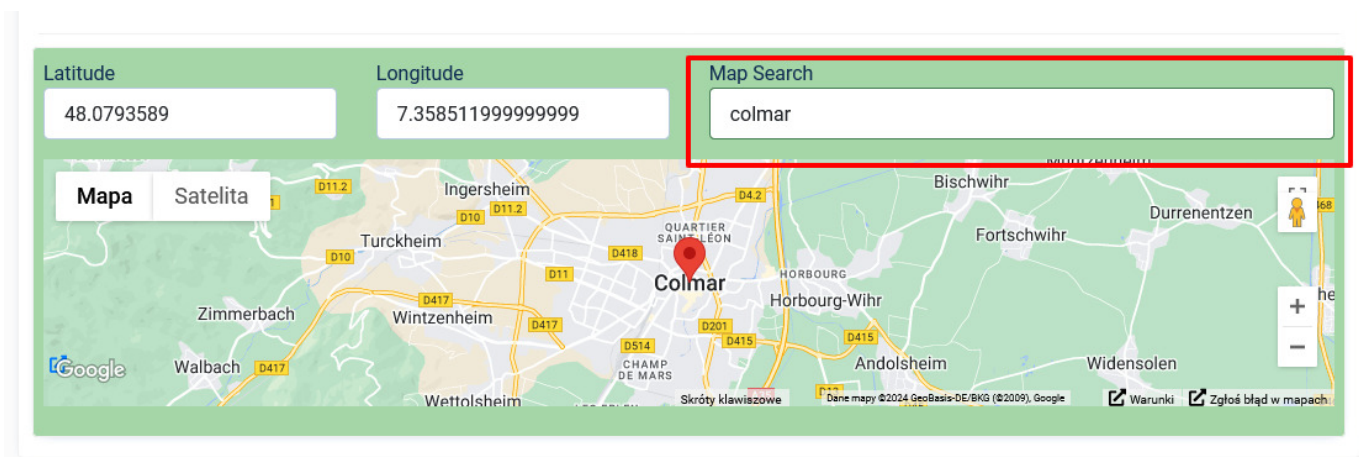

If you provide the latitudes and longitudes, and the Maps Search setting is left blank, the location mapping is done based on these parameters as shown in the following image.

### Screen 3: Map using longitudes and latitudes values

## Mapping with Map Search values

If the Map Search field has a value provided to it, it takes precedence as shown in the following image. If the Map Search field value is given as “New York”, the location will map to this location.

### Screen 4: Map using Map Search Field values

## Images tab

This tab includes information about images and videos attached to the listing. Before you can add images to the listing, you must save your listing at least once. This ensure that all the other data you have filled for the listing does not disappear after the images are added.

The Images tab can be seen as shown in the following image:

Upload
