

Venue

Overview

Venues are locations where the event is to be held. You can add arenas, concert halls, or more based on your requirements. Before you create Venues, ensure that you have created Venue Categories.

Creating A New Venue

To create a new Venue, click New. The following image shows the venues listing in the venues administration screen.

The screenshot displays the Joomla! administration interface for the 'Venues' component. The top navigation bar includes links to Home Dashboard, Content, Menus, Components, Users, System, and Help. The Joomla! logo and version number (4.3.4) are also visible. The main header shows the 'Venues' title and a 'JomEvents Comdev' extension link. Below the header, there are buttons for 'Save', 'Save & Close', 'Save & New', 'Save as Copy', and 'Close'. The 'Edit Venue' form is divided into three tabs: 'Edit Venue' (active), 'Images', and 'Metadata'. The 'Edit Venue' tab contains the following fields:

- Name ***: Text input field containing 'COLMAR'.
- Alias**: Text input field containing 'colmar'.
- Category ***: Dropdown menu with 'Arena' selected.
- Address**: Dropdown menu with 'Colmar' selected.
- Street, Number**: Text input field.
- Description**: Text area with a small table header showing '1'.

On the right side, there is a green sidebar containing the following fields:

- User**: Select a User button.
- Language**: Dropdown menu with 'All' selected.
- Status**: Dropdown menu with 'Published' selected.
- Approved**: Dropdown menu with 'Yes' selected.
- Date created**: Text input field showing '2016-12-21 16:40:26' with a calendar icon.
- Modified Date**: Text input field with a calendar icon.
- Publish Up**: Text input field showing '2016-12-21 16:40:26' with a calendar icon.
- Publish down**: Text input field with a calendar icon.
- ID**: Text input field showing '14'.

Longitude	<p>The information provided in this field is used to map the exact location. It utilizes the GEO-location based on Google Maps.</p> <p>Provide the longitude information for the location mapping.</p>
Map Search	Search for a specific location. Type in the location and press Enter to go to the exact location.

Understanding the Location area in Edit listing tab

Let us understand how to provide the address and Street/House No for providing the exact locations on the map. When you provide the address, street and House No. in the backend when creating venues, the location position automatically. If the House No. is not provided, additional location fields needs to be used.

Mapping using longitudes and latitudes

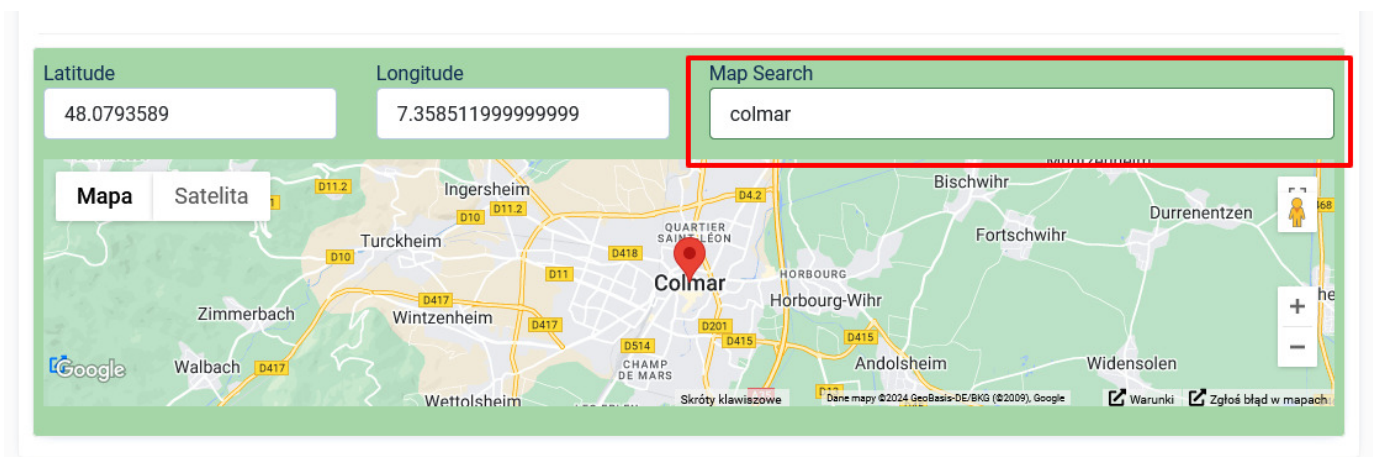

If you provide the latitudes and longitudes, and the Maps Search setting is left blank, the location mapping is done based on these parameters as shown in the following image.

Screen 3: Map using longitudes and latitudes values

Mapping with Map Search values

If the Map Search field has a value provided to it, it takes precedence as shown in the following image. If the Map Search field value is given as “New York”, the location will map to this location.

Screen 4: Map using Map Search Field values

Images tab

This tab includes information about images and videos attached to the listing. Before you can add images to the listing, you must save your listing at least once. This ensure that all the other data you have filled for the listing does not disappear after the images are added.

The Images tab can be seen as shown in the following image:

Upload
