# Latest Items Module

## Overview

Modules are extensions that assist in creating blocks of information on your site. They aggregate information from components and can be placed in predefined positions on the page based on your Joomla template.

## JomHoliday Latest module

This module helps you create the panel where latest listings are displayed. You can decide where to position the latest panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager > JomHoliday Items**

## Editing the JomHoliday Latest module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

Screen 7: Module tab

Module tab

This tab controls the layout where the latest listings panel is to be displayed on the screen.

Provide the options as per the following table.

<b>Layout</b>	<p>Select the required layout in the Layout field. The available options are:</p> <ul style="list-style-type: none"> <li>• Slider – Displays the latest listings in the form of a slideshow.</li> <li>• Default –Displays the latest listings in the default format.</li> </ul>  <ul style="list-style-type: none"> <li>• Grid – Displays the latest listings in a grid format.</li> </ul>  <ul style="list-style-type: none"> <li>• Clean - Displays the latest listings in a clean format</li> </ul>
<b>Columns count</b>	Number of columns of listing that should be listed in the panel
<b>Count</b>	Number of listings that should be listed in the panel.
<b>A number of Characters</b>	Number of characters that will be displayed in the short description for listing thumbnail.
<b>Image Width</b>	Provide the image width for the thumbnail image. If Slider Layout set, image width must be the same size than Slider Width or larger.
<b>Image Format</b>	<p>The format for the thumbnail listing image.</p> <p>1:1 = Image will be unchanged.</p> <p>4:3 = image will be resized to 4:3 format.</p> <p>10:9 = Image will be resized to 10:9 format.</p>
<b>Latest or IDs</b>	<p>Select how you want the listings to be displayed as:</p> <ul style="list-style-type: none"> <li>• Latest</li> <li>• IDs</li> </ul>
<b>Enter IDs</b>	If ID is selected in the column above, mention the starting ID of the listing.
<b>Featured</b>	Enable to show only featured listings.
<b>Show Address</b>	Enable to show the address of the listing.
<b>Show Description</b>	Enable to show the description up to the character limit set.

<b>Category</b>	<p>Enable either of the following options.</p> <ul style="list-style-type: none"> <li>• Current Browse (auto) – Automatically displayed based on the category.</li> <li>• Selected Below – Listings belonging to only these categories are shown.</li> </ul>
<b>Choose Category</b>	If Selected Below is selected for the above field, select the required category.
<b>Sort Options</b>	<p>Select how the displayed listings should be sorted by.</p> <ul style="list-style-type: none"> <li>• Latest</li> <li>• Most Viewed</li> <li>• Alphabetically</li> <li>• Updated</li> <li>• Most Rated DESC</li> <li>• Most Rated ASC</li> </ul>
<b>Slider Settings</b>	Heading
<b>Slider Width</b>	Slider width in pixels
<b>Slider Height</b>	Slider height in pixels
<b>Slide Delay (seconds)</b>	Slideshow delay in seconds
<b>Slider Shadow</b>	Enable to provide the shadow effect.
<b>Slider Thumbs</b>	Enable to show image thumbnails
<b>Slider Caption</b>	Enable to show the image caption.
<b>Show Title</b>	Show or hide the title for the search panel.
<b>Position</b>	Select the position based on your Joomla Template.
<b>Status</b>	<p>Select from the given options.</p> <ul style="list-style-type: none"> <li>• Published</li> <li>• Unpublished</li> <li>• Trashed</li> </ul>
<b>Start Publishing</b>	Provide a date when the latest listings panel should be published.
<b>Finish Publishing</b>	Provide a date when the latest listings panel should be unpublished.
<b>Access</b>	<p>Provide access level for the panel.</p> <ul style="list-style-type: none"> <li>• Guest</li> <li>• Public</li> <li>• Registered</li> <li>• Special</li> </ul>
<b>Ordering</b>	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.

Language	Select the language for which you want to display this panel. For each language, you must create a new JomHoliday Latest module.
Note	Provide additional information.

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

# Search Module

## JomHoliday Search module

This module helps you create the search panel with fields that are searchable. All the fields that are defined as searchable during creation can be seen on this panel. You can decide where to position the search panel on the page and also control on which pages the panel should appear. To view all the available modules, click **Extension > Module Manager > JomHoliday Search**

To create a new module, click **New**. Select the JomHoliday Search module. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the JomHoliday Search module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

## Screen 2: Search Module

### Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

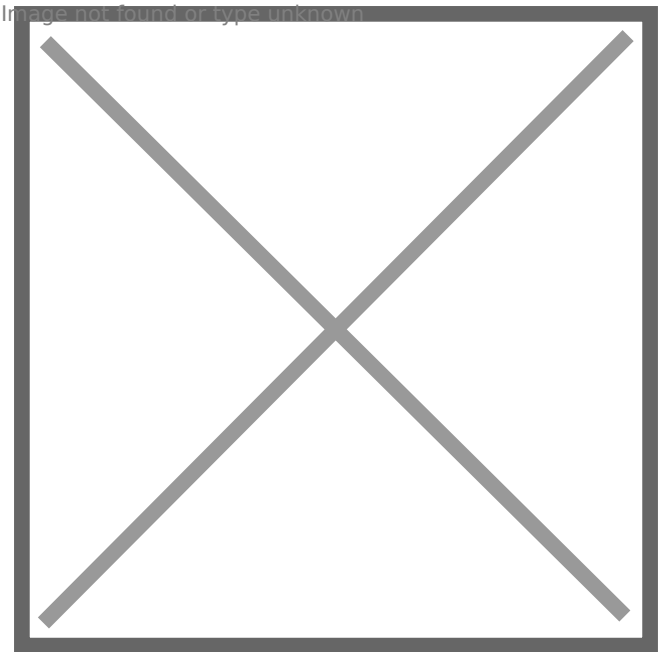

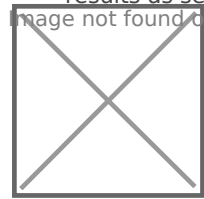

Layout

Select the required layout in the Layout field. The available options are:

- Horizontal – Horizontal Keyword field, category and address search field as seen in the following image:

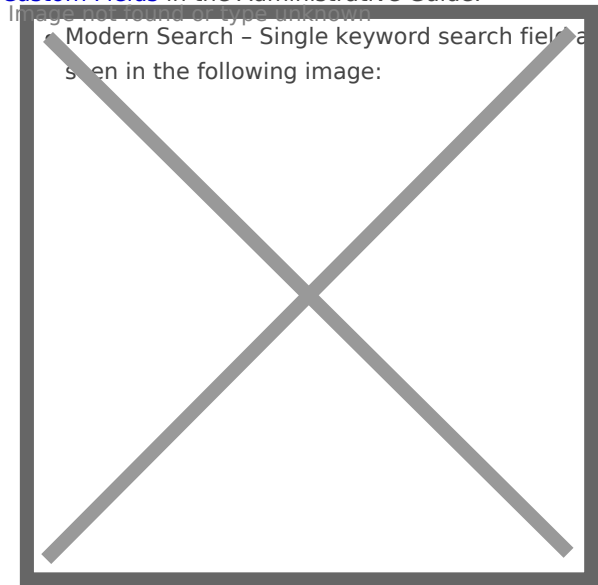

- Side Search – Vertical Side panel to filter search results as seen in the following image:

Custom fields that have the Field can be Searched field enabled are seen in this panel. For more information, see

[Custom Fields](#) in the Administrative Guide.

- Modern Search – Single keyword search field as seen in the following image:

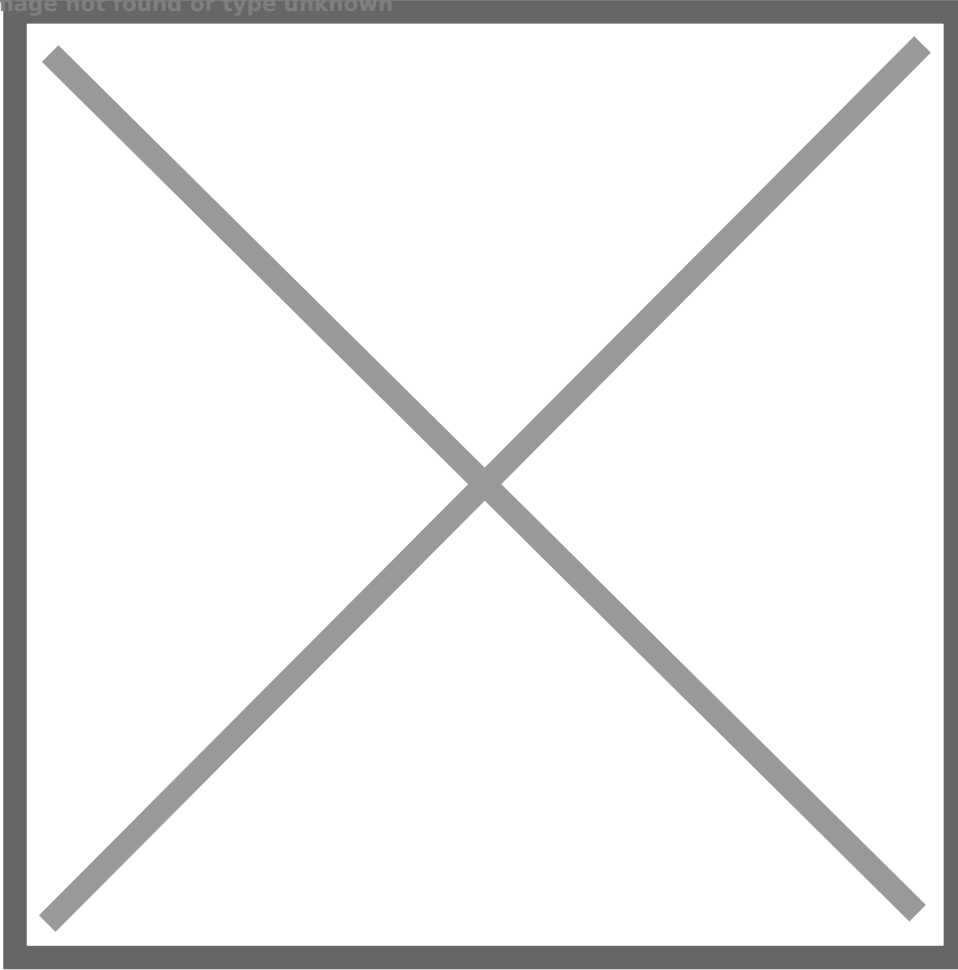

<b>Show Address</b>	Hide or Show the address field in the frontend
<b>Show category</b>	Hide or Show category selection in the frontend
<b>Custom Fields</b>	Select if search should process custom fields
<b>Default category</b>	Select a default category that will be preselected in the frontend
<b>Show Title</b>	Show or hide the title for the search panel.
<b>Position</b>	Select the position based on your Joomla Template.
<b>Start Publishing</b>	Provide a date when the search panel should be published.
<b>Finish Publishing</b>	Provide a date when the search panel should be unpublished.
<b>Access</b>	Provide access level for the panel. <ul style="list-style-type: none"> <li>• Guest</li> <li>• Public</li> <li>• Registered</li> <li>• Special</li> </ul>
<b>Ordering</b>	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
<b>Language</b>	Select the language for which you want to display this panel. For each language, you must create a new JomHoliday Search module.
<b>Note</b>	Provide additional information.

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

Image not found or type unknown

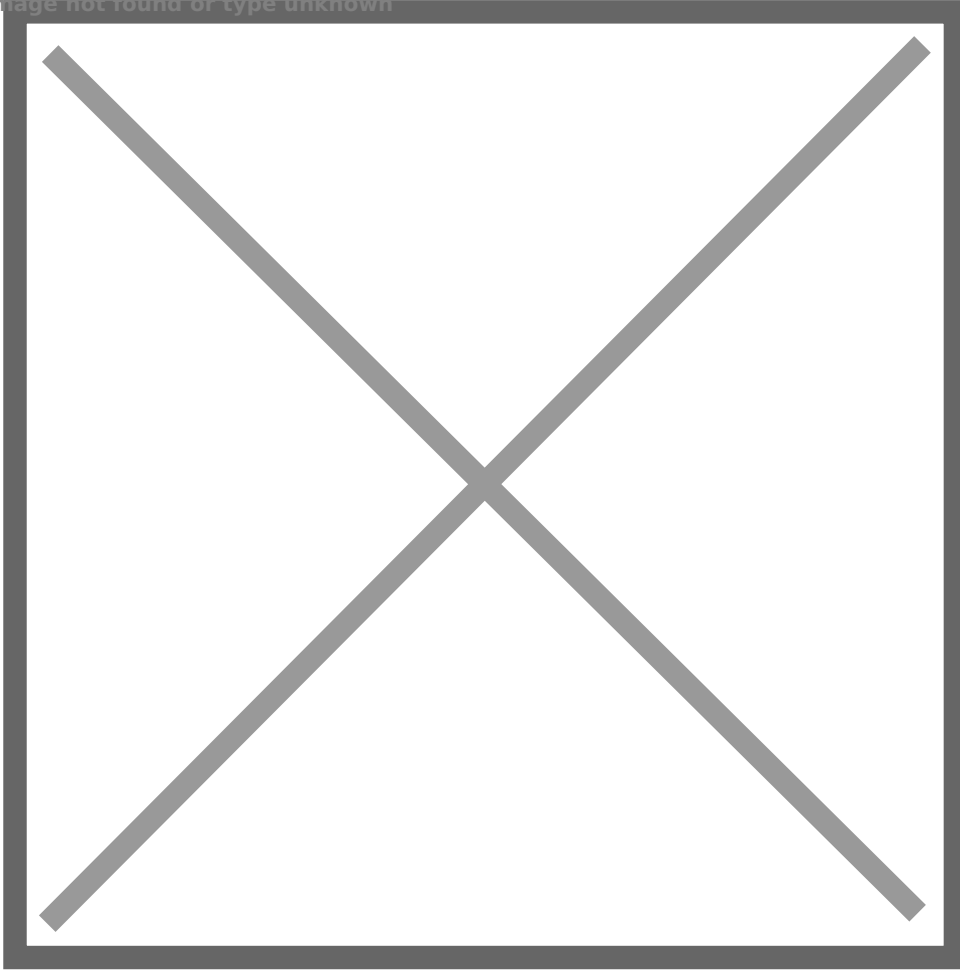

#### **Screen 4: Menu Assignment tab**

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected

For the last two options, the screen is as shown in the following image:

Image not found or type unknown

## Screen 5: Menu Assignment options

# Live Search Maps Module

## Overview

**This is an extra paid module available for Business Package, can be also purchased separately.**

This module helps you view all the listings under full view or windowed map To view all the available modules, click **Extension > Module Manager**.

To create a new module, click **New**. Select the **EXTENSION\_NAME Maps module**. Provide the information as given in the following sections. Click **Save** to save the module.

## Editing the Maps Module

To edit the module, click on the module link or select the checkbox next to the module name, and then click **Edit**.

The following image shows the module edit screen.

The screenshot displays the 'JomHoliday Ajax Maps' module edit screen. The interface is divided into several sections:

- Module Manager Tabs:** Module (selected), Menu Assignment, Advanced, Template, Permissions.
- Module Information:** Title: JomHoliday Ajax Maps, Site: JomHoliday Ajax Maps.
- Layout Settings:** Layout: Map Wide (dropdown), Display Limit: 100, Map Width: 100%, Map Height: 100vh, Top Margin: 155px.
- Display Options:** Display Category: Yes (selected), Display Keyword: Yes (selected), Address Radius Search: Yes (selected).
- Publishing Settings:** Title: Hide, Position: top (dropdown), Status: Published (dropdown), Start Publishing: (calendar icon), Finish Publishing: (calendar icon).
- Access and Ordering:** Access: Public (dropdown), Ordering: 1. JomHoliday Ajax Maps WIDE (dropdown).
- Note:** (text area).

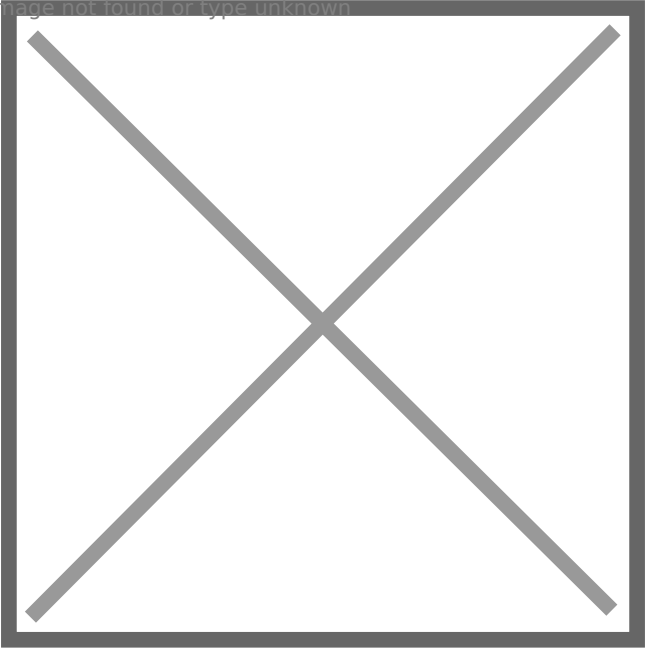

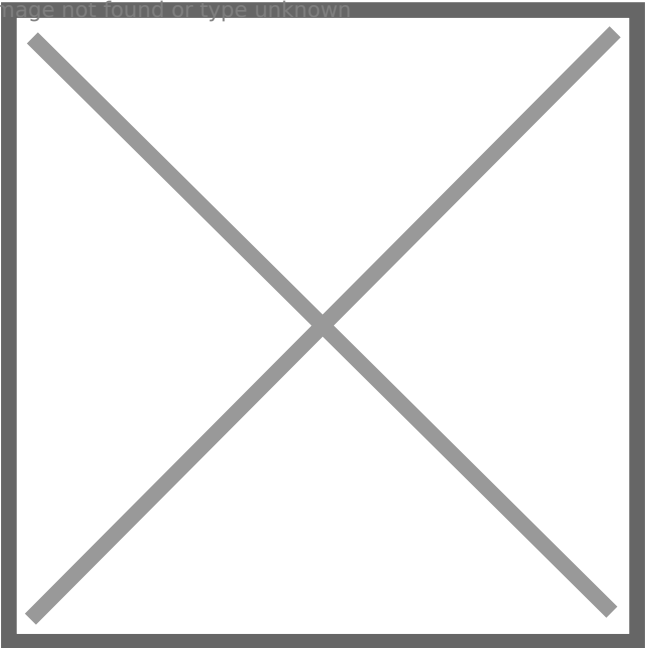

### Screen 2: Module tab

# Module tab

This tab controls the layout where the search panel is to be displayed on the screen.

## Screen 3: Module tab

Provide the options as per the following table.

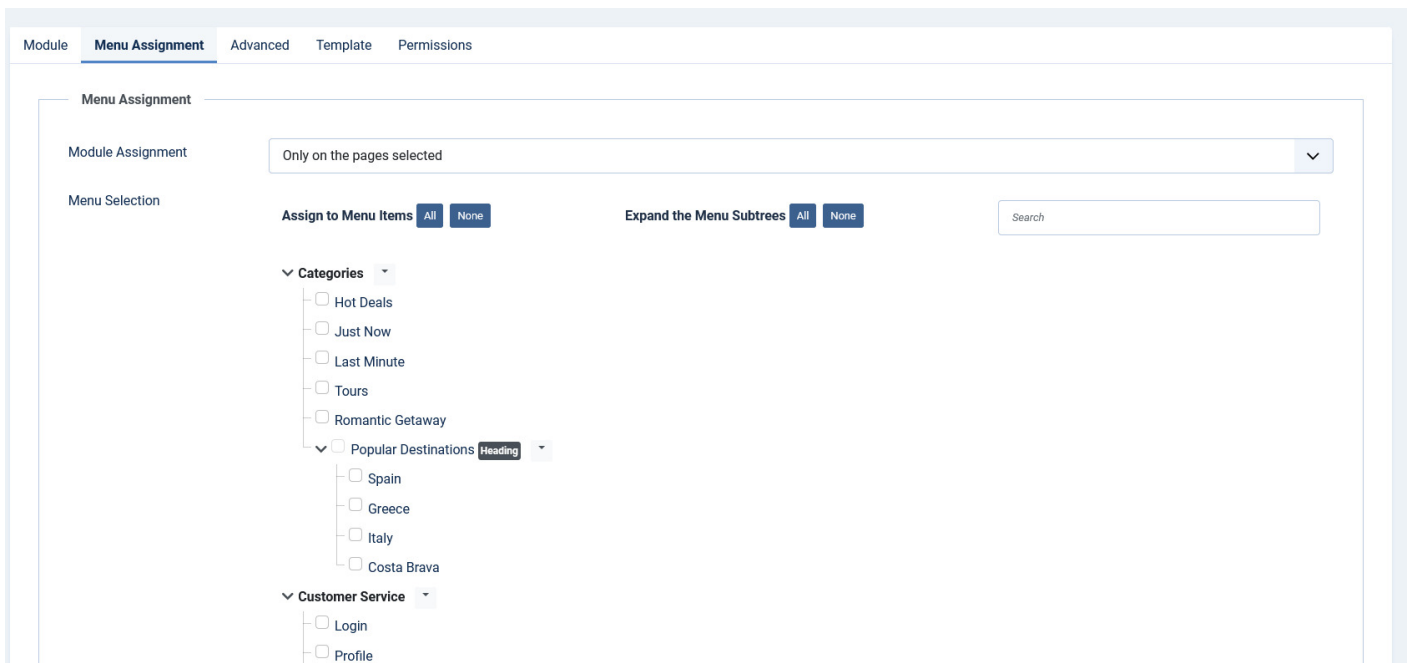

<b>Layout</b>	<p>Select the required layout in the Layout field. The available options are:</p> <p><b>Maps Wide</b> – layout with the search module on the left side and big map area on the right side, as seen in the following image:</p> <p>Image not found or type unknown</p>  <p><b>Maps</b> – layout showing items on a map as seen in the following image:</p> <p>Image not found or type unknown</p> 
<b>Display limit</b>	Limit number of items shown on the map
<b>Map width</b>	Set width of the map
<b>Map height</b>	Set height of the map

<b>Top margin</b>	Set top margin of the map
<b>Display Category</b>	Display category selection on the left of the wide map layout
<b>Display Address</b>	Display address selection on the left of the wide map layout
<b>Display Keyword</b>	Display keywords selection on the left of the wide map layout
<b>Position</b>	Select the position based on your Joomla Template.
<b>Start Publishing</b>	Provide a date when the search panel should be published.
<b>Finish Publishing</b>	Provide a date when the search panel should be unpublished.
<b>Access</b>	Provide access level for the panel. <ul style="list-style-type: none"> <li>• Guest</li> <li>• Public</li> <li>• Registered</li> <li>• Special</li> </ul>
<b>Ordering</b>	Provide the order in which the side panel should appear. If more than one module is positioned at the same location, you can set the order of appearance in this field.
<b>Language</b>	Select the language for which you want to display this panel. For each language, you must create a new JomDirectory Search module.
<b>Note</b>	Provide additional information.

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

## Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected

# Creating custom category markers

When any listing is displayed on the map, it is shown as a pin. This pin icon is as in the default template. To modify this pinned icon as per your category, marker image needs to be placed under module images directory:

```
modules/mod_EXTENSION-NAME_images/markers/...
```

The file name should be same as the category. The spaces need to be replaced with dashes " - " and the "marker" prefix. So, suppose category name is **Auto Parts**, then the file name for the marker should be **marker\_auto-parts.png**.

# Slideshow PRO Module

## Overview

**This is an extra paid module available for Business Package, can be also purchased separately.**

This module showcases the listings in a slideshow format. Users can see the image along with the title of the listing.

Slideshow PRO Module upon activation is seen as follows on the pages:

**Screen 1: Slideshow Module on front page**

# Editing Slideshow Module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

Note

## Screen 2: Module tab

Provide the options as per the following table.

Count	Number of listings for which images need to be shown in the slideshow
Number of characters	Number of characters from the description that will be shown in the slideshow.
Image Format	The format for the thumbnail listing image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.
Featured	Enable to show only featured listings.

<b>Show Address</b>	Enable to show the address of the listing.
<b>Show Description</b>	Enable to show the description up to the character limit set.
<b>Category</b>	<p>Select either of the following options.</p> <ul style="list-style-type: none"> <li>• Current Browse (auto) – Automatically displayed based on the category.</li> <li>• Selected Below – Listings belonging to only these categories are shown.</li> </ul>
<b>Choose Category</b>	If Selected Below is selected for the above field, select the required category.
<b>Sort Options</b>	<p>Select how the displayed listings should be sorted by.</p> <ul style="list-style-type: none"> <li>• Latest</li> <li>• Most Viewed</li> <li>• Alphabetically</li> <li>• Updated</li> <li>• Most Rated DESC</li> <li>• Most Rated ASC</li> </ul>
<b>Use Listings IDs</b>	Enable to make the next set of settings work.
<b>IDs CSS Item Styling</b>	Provide comma separated IDs in this field. Such as, 21, 22 and so on.
<b>Use IDs for the CSS Classes</b>	<p>If set to yes, to each Caption, CSS Class ID will be added e.g. .jd-slide-title21 where 21 is ID of the listing. Listing ID can be found under JomEvents Listing View in Table - Column ID. It works best with <b>Use Listings ID's</b> setting</p> <p>You can select individual listings and promote them with different captions.</p> <p>If set to No, the default CSS will be used for all captions.</p>

## Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

The screenshot shows the 'Menu Assignment' tab within a larger interface. At the top, there are tabs for 'Module', 'Menu Assignment' (which is active), 'Advanced', 'Template', and 'Permissions'. Below the tabs, the 'Menu Assignment' section is visible. It includes a 'Module Assignment' dropdown menu currently set to 'Only on the pages selected'. Below this, the 'Menu Selection' section contains two groups of buttons: 'Assign to Menu Items' with 'All' and 'None' options, and 'Expand the Menu Subtrees' with 'All' and 'None' options. A search bar is also present. The main area displays a tree structure of menu items. Under the 'Categories' dropdown, there are checkboxes for 'Hot Deals', 'Just Now', 'Last Minute', 'Tours', 'Romantic Getaway', and 'Popular Destinations'. The 'Popular Destinations' item is expanded, showing a sub-tree with checkboxes for 'Spain', 'Greece', 'Italy', and 'Costa Brava'. The 'Popular Destinations' item has a 'Heading' label next to it. Under the 'Customer Service' dropdown, there are checkboxes for 'Login' and 'Profile'.

## Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected
