

Configuration Steps

Overview

These configuration steps need to be done in order for the component to work correctly

Create Menu links

More about menu links can be [found here](#).

Items menu link needs to be created.

Items Link	Link which does not point to any category or address	Latest Link which displays latest added listings 	<ul style="list-style-type: none">■ Listing details may not be accessible■ This link is being used to display search results, so if the alias is latest than site URL for the search results will be <code>http://domain.com/latest</code>
------------	--	---	---

Items Link - Category	Links for each of the category. A separate menu can be created with all the categories created.	Menu with all categories  	<ul style="list-style-type: none"> ■ Listing details may not be accessible ■ Individual menu settings can't be applied
------------------------------	--	--	--

Joomla / Groups

Membership Plans are based on the Joomla Groups therefore before creating any of the Membership plans - corresponding Joomla groups needs to be created. The main group for the component needs to be called JomHoliday. Each of the plans needs to be placed under that JomHoliday parent group e.g.

JomHoliday

- Free
- Basic
- Silver
- Gold

Group Title	Permissions	Enabled Users	Blocked Users	ID
Public		0	0	1
- Guest		0	0	9
- Manager		1	0	6
- Administrator		0	0	7
- Registered		8	0	2
- Author		0	0	3
- Editor		0	0	4
- Publisher		0	0	5
- JomHoliday		1	0	10
- Basic		0	0	12
- Free		1	0	11
- Gold		0	0	14
- Silver		1	0	13
- Super Users		1	0	8

Permissions

It is important to set the right permissions for the components: Comdev and Directory, in order for the users to access the Front Admin. Otherwise, Users won't be able to access the Front Admin (Permissions Denied) or get 500 Error when trying to upload the images.

An example below shows access for the Registered Group. Same settings should be applied for each group that should have access to the Front Admin.

Permissions

Permissions

Expand for notes about setting the permissions.

If you change the setting, it will apply to this and all child groups, components and content. Note that **Denied** will overrule any inherited setting and also the setting in any child group, component or content. In the case of a setting conflict, **Deny** will take precedence. **Not Set** is equivalent to **Denied** but can be changed in child groups, components and content.

Public	Action	Select New Setting	Calculated Setting
- Guest	Configure ACL & Options	Inherited	Not Allowed (Inherited)
- Manager	Access Administration Interface	Allowed	Allowed
- Administrator	Create	Allowed	Allowed
- Registered	Delete	Allowed	Allowed
- Author	Edit	Allowed	Allowed
- Editor	Edit State	Allowed	Allowed
- Publisher	Edit Own	Allowed	Allowed
- JomEstate			
- Basic			
- Business			
- Small			
- Super Users
