

Slideshow PRO Module

Overview

This is an extra paid module available for Business Package, can be also purchased separately.

This module showcases the listings in a slideshow format. Users can see the image along with the title of the listing.

Slideshow PRO Module upon activation is seen as follows on the pages:

Screen 1: Slideshow Module on front page

Editing Slideshow Module

To edit the module, click on the module link or select the check box next to the module name, and then click **Edit**.

The following image shows the module edit screen.

Screen 2: Module tab

Provide the options as per the following table.

Count	Number of listings for which images need to be shown in the slideshow
Number of characters	Number of characters from the description that will be shown in the slideshow.
Image Format	The format for the thumbnail listing image. 1:1 = Image will be unchanged. 4:3 = image will be resized to 4:3 format. 10:9 = Image will be resized to 10:9 format.
Featured	Enable to show only featured listings.

Show Address	Enable to show the address of the listing.
Show Description	Enable to show the description up to the character limit set.
Category	<p>Select either of the following options.</p> <ul style="list-style-type: none"> • Current Browse (auto) – Automatically displayed based on the category. • Selected Below – Listings belonging to only these categories are shown.
Choose Category	If Selected Below is selected for the above field, select the required category.
Sort Options	<p>Select how the displayed listings should be sorted by.</p> <ul style="list-style-type: none"> • Latest • Most Viewed • Alphabetically • Updated • Most Rated DESC • Most Rated ASC
Use Listings IDs	Enable to make the next set of settings work.
IDs CSS Item Styling	Provide comma separated IDs in this field. Such as, 21, 22 and so on.
Use IDs for the CSS Classes	<p>If set to yes, to each Caption, CSS Class ID will be added e.g. .jd-slide-title21 where 21 is ID of the listing. Listing ID can be found under JomEvents Listing View in Table - Column ID. It works best with Use Listings ID's setting</p> <p>You can select individual listings and promote them with different captions.</p> <p>If set to No, the default CSS will be used for all captions.</p>

Menu Assignment tab

This tab controls where the module should be displayed. You can decide if it should be displayed on all pages for the site or just selective pages.

The screenshot shows the 'Menu Assignment' tab within a software interface. At the top, there are four tabs: 'Module', 'Menu Assignment' (which is active), 'Advanced', 'Template', and 'Permissions'. Below the tabs, the 'Menu Assignment' section is visible. It includes a 'Module Assignment' dropdown menu currently set to 'Only on the pages selected'. Below this, there is a 'Menu Selection' section. It contains two groups of buttons: 'Assign to Menu Items' with 'All' and 'None' options, and 'Expand the Menu Subtrees' with 'All' and 'None' options. To the right of these buttons is a search input field labeled 'Search'. Below the buttons, there are two expandable sections: 'Categories' and 'Customer Service'. The 'Categories' section is expanded, showing a list of categories with checkboxes: 'Hot Deals', 'Just Now', 'Last Minute', 'Tours', 'Romantic Getaway', and 'Popular Destinations'. The 'Popular Destinations' category is further expanded, showing sub-items: 'Spain', 'Greece', 'Italy', and 'Costa Brava'. The 'Customer Service' section is also expanded, showing 'Login' and 'Profile' with checkboxes.

Screen 4: Menu Assignment tab

Select the required menu for module assignment. The available options are:

- On all pages
- No pages
- Only on the pages selected
- On all pages except those selected
