

How to display your first Download List

Displaying your downloads is easier than you might imagine. Simply navigate to the right side and click on the "Download Lists" menu link. Each download list has assigned its own unique shortcode, which can then be used to publish downloads on your website.

The screenshot shows the WordPress dashboard for the 'Comdev Downloads' plugin. The left sidebar has a menu with 'Comdev -> Downloads' selected. The main area shows a 'Downloads' section with a table of items. Two items are listed: 'New Package' and 'Package 1'. Their shortcodes are highlighted with red boxes: '[comdev_download list-id="78" te' and '[comdev_download list-id="73" te'. The table has columns for Title, Short code, Categories, Tags, and Date.

Title	Short code	Categories	Tags	Date
New Package	[comdev_download list-id="78" te	—	—	Published 2024/05/16 at 13:14
Package 1	[comdev_download list-id="73" te	—	—	Published 2024/05/14 at 13:28

Placing shortcode under Wordpress Page/Post

Grab the generated shortcode by simply copy it. Locate the shortcode block or directly insert the code into the desired post or page to display the link.

The screenshot shows the 'New' post editor in WordPress. At the top, there's a 'New' heading. Below it, there's a toolbar with icons for undo, redo, and list. A 'Shortcode' block is added, containing the shortcode: '[comdev_download list-id="73" template-id="1"]'. The shortcode is highlighted with a red box.

That's all set! You're now able to offer downloadable content to your website users.
